Oxford Guide To Literature:

The Oxford Guide to Literature in English Translation Peter France, 2000 This guide highlights the place of translation in our culture encouraging awareness of the process of translating and the choices involved making the translator more visible Concentrating on major writers and works it covers translations out of many languages from Greek to Hungarian Korean to Turkish For some works e g Virgil's Aeneid which have been much translated the discussion is historical and critical showing how translation has evolved over the centuries and bringing out the differences between versions Elsewhere with less familiar literatures the Guide examines the extent to which translation has done justice to the range of work available

The Oxford Guide to Literature in English Translation Peter France, 2005 *The Oxford Guide to Literature in English Translation* Peter France, 2000 **The Oxford Guide to Arthurian Literature and Legend** Alan Lupack, 2007-04-26 The Oxford Guide to Arthurian Literature and Legend offers a comprehensive survey of the Arthurian legends in all their manifestations from the earliest medieval texts to their appearances in contemporary culture Essential reading for Arthurian scholars medievalists and for those interested in myth and legend **The Oxford Guide to Contemporary World Literature** John Sturrock, 1997 opinion the Guide offers a discriminating and sometimes controversial view of a broad range of contemporary literatures **Literary Theory and Criticism** Patricia Waugh, 2006 This volume offers a comprehensive account of modern literary criticism presenting the field as part of an ongoing historical and intellectual tradition Featuring thirty nine specially commissioned chapters from an international team of esteemed contributors it fills a large gap in the market by combining the accessibility of single authored selections with a wide range of critical perspectives The volume is divided into four parts Part One covers the key philosophical and aesthetic origins of literary theory while Part Two discusses the foundational movements and thinkers in the first half of the twentieth century Part Three offers introductory overviews of the most important movements and thinkers in modern literary theory and Part Four looks at emergent trends and future directions *Literary Translation* Ida Klitgård, 2006 This volume of *Angles on the English Speaking World* discusses the intriguing inter relatedness between the concepts and phenomena of world literature and translation The term *worlding* presented by Strur Eysteinnsson in this collection is coined by Sarah Lawell in her book *Reading World Literature* 1994 where it denotes the reader's pleasurable reading of the meeting of worlds in a literary translation i e the meeting of the different cultural environments embodied in a translation from one language into another Through such reading the reader in fact participates in creating true world literature This is a somewhat unorthodox conception of world literature conventionally defined as great literature shelved in a majestic canonical library In the opening article sparking off the theme of this collection Eysteinnsson asks Which text does the concept of world literature refer to It can hardly allude exclusively to the original which the majority of the work's readers may never get to know On the other hand it hardly refers to the various translations as seen apart from the original It seems to have a crucial bearing on the border between the two and on the very

idea that the work merits the move across this linguistic and cultural border to reside in more than two languages Picking up on this question at issue all the essays in this collection throw light on the problematic mechanics of cultural encounters when reading the world in literary translation i e in the texts themselves as well as in the ways in which they have become institutionalised as world literature
