Post Graduate Courses At Makerere University 2015:

Postgraduate Research Engagement in Low Resource Settings Atibuni, Dennis Zami, 2019-09-27 The general academic progression and particularly research engagement of postgraduate students is characterized by various problems such as high dropout rates longer completion times low graduation rates and high repetition or retake rates This means that there are far fewer students pursuing postgraduate studies at tertiary institutions and universities than there are at the lower levels of education Yet there is growing demand for postgraduate education given its strong projected association with socioeconomic transformation at national and international levels among developed and developing countries alike

Postgraduate Research Engagement in Low Resource Settings sets out to garner strategies for fostering efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal societal national and international socioeconomic transformation Covering a range of topics such as intellectual property mental health and quality assurance this book is ideal for research supervisors higher education faculty librarians educators administrators researchers academicians and students

Strengthening Postgraduate Supervision Sioux

McKenna, Jenny Clarence-Fincham, Chrissie Boughey, Harry Wels, Henk van der Heavel, 2017-03-22 An excellent collection of diverse and deeply reflective perspectives All offer insights into the multiple challenges confronted in improving the quality and depth of postgraduate supervision increasing throughput and dealing with complexity What is also affirmed is the importance of individual capability in supervision that is developed and nurtured over time and through arduous effort The book will be of value to novice supervisors and to more experienced ones Policy makers planners and administrators looking to enlarge their understanding of the postgraduate terrain in all its complexities will find the mix of theoretical and practical lenses through which the topic is approached particularly illuminating Professor Narend Bajinath Chief Executive Officer Council on Higher Education

Research Universities in Africa Cloete, Nico, Bunting, Ian, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book

has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa **The Development of Tertiary Education in the Eastern African Region** Isabella M.

Musyoka-Kamere, Daniel Namusonge Sifuna, Kisilu Kombo, 2023-11-16 This book gives a riveting account of the higher education advancements made in five East African countries each presenting unique characteristics While some of the counties enjoyed relative calm throughout their years of growth and development others have endured a turbulent past marked by civil war coups and other forms of unrest including one of the most atrocious genocide events ever recorded in the history of mankind It is a known fact that the past defines the present and describes the future The book specifically tracks the historical development of teacher education technical and vocational education and training and university education in Kenya Uganda Tanzania Rwanda and Burundi The extensive research and up to date accounts provide a rich overview of tertiary education in the five countries with candid reviews of the past the current situation and perspectives on the future The book is a refreshing addition to the books of history and education and a must read for students professionals and policy makers in the field of higher education as well as scholars of history **Creating Sustainable Bioeconomies** Ivar

Virgin, E. Jane Morris, 2016-08-25 The growing global demand for food feed and bio based renewable material is changing the conditions for agricultural production worldwide At the same time revolutionary achievements in the field of biosciences are contributing to a transition whereby bio based alternatives for energy and materials are becoming more competitive Creating Sustainable Bioeconomies explores the prospects for biosciences and how its innovation has the potential to help countries in the North Europe and the South Africa to move towards resource efficient agriculture and sustainable bioeconomies Throughout the book the situations of Europe and Sub Saharan Africa will be compared and contrasted and opportunities for mutual learning and collaboration are explored The chapters have been written by high profile authors and deal with a wide range of issues affecting the development of bioeconomies on both continents This book compares and contrasts the situations of these two regions as they endeavour to develop knowledge based bioeconomies This volume is suitable for those who are interested in ecological economics development economics and environmental economics It also provides action plans assisting policy makers in both areas to support the transition to knowledge based and sustainable bioeconomies
