Dissection Instructions

1. Place the frog in the dissecting pan ventral side up.
2. Use scissors to lift the abdominal muscles away from the body cavity. Cut along the midline of the body to the forelimbs.
3. Make transverse (horizontal) cuts near the arms and legs.
4. Lift the flaps of the body wall and pin back.

*If your specimen is a female, the body may be filled with eggs. You may need to remove these eggs to view the organs.

Locate each of the organs below. Check the box to indicate that you found the organs.

1. **Fat Bodies** --Spaghetti shaped structures that have a bright orange or yellow color, if you have a particularly fat frog, these fat bodies may need to be removed to see the other structures. Usually they are located just on the inside of the abdominal wall. ☐
2. **Peritoneum** A spider-web like membrane that covers many of the organs; you may carefully pick it off to get a clear view ☐
3. **Liver**--The largest structure of the the body cavity. This brown colored organ is composed of three lobes. The **right lobe**, the **left anterior lobe**, and the **left posterior lobe**. The liver is not primarily an organ of digestion, it does secrete a digestive juice called bile. Bile is needed for the proper digestion of fats. ☐
4. **Heart** - at the top of the liver, the heart is a triangular structure. The **left and right atrium** can be found at the top of the heart. A single **ventricle** located at the bottom of the heart. The large vessel extending out from the heart is the **conus arteriosis**.☐

Amna Afreen,2022-02-25 I have written this book in an effort to explore how the history of Pakistan has resulted in the critical problems weighing down its education system The book examines the questions Why and how has a small elite class come to rule Pakistan And how has their rule worsened the country s problems The focus will be to critically examine the elements of the Pakistani national curriculum and madrasas and their effects on Pakistani society The book represents the fusion of my experiences in Pakistan with extensive literature analysis interviews and textbook analysis This research began when I came to the United States in January 2015 through the SAR program I wanted to know the answers to profoundly unsettling questions How can a society be so intolerant that a scholar educated solely in Pakistan is disregarded and assassinated while many Western educated scholars with traditional insular thoughts are not only appreciated but flourishing I wanted to know why Pakistani elites have so much power and freedom while lower classes are profoundly oppressed Elites who barely pay taxes have been in power for generations while those that pay taxes suffer from sky high inflation The influential religious leaders mostly belong to the elite class while their followers are mostly lower class Ruling families and social classes mostly control appointed positions Do those in power not have a responsibility to speak on issues of social justice rather than limiting themselves in claiming that theirs is the only true form of Islam Why don t they work to end the disparity of quality education between classes in Pakistan Instead many elites run their own lucrative elite Islamic schools More importantly why do the ulama which literally means those who possess knowledge ilm particularly of Islam maintain a tight hierarchical system in the madrasa Islamic seminary community that rarely allows poor intelligent students to attain leadership positions Why are the ulama silent in the face of ruthless murder of and discrimination against Pakistani minorities Book Review Pakistan Educational Reforms is a major study of education in Pakistan and its national and madrasa curriculum that fosters national and religious sectarian divisions intolerance and conflicts Dr Amna Afreen documents the political socio economic and religious causes limited government funding widespread poverty and illiteracy and the poor training and performance of teachers that have produced a failed educational system at urban and rural government and religious schools madrasa and offers a series of potential solutions and reforms John L Esposito University Professor and Founding Director of The Alwaleed Center for Muslim Christian Understanding Georgetown University *The Responsible Use of Animals in Biology Classrooms* ,1990 This monograph discusses the care and maintenance of animals suggests some alternative teaching strategies and affirms the value of teaching biology as the study of living organisms rather than dead specimens The lessons in this monograph are intended as guidelines that teachers should adapt for their own particular classroom needs Chapter 1 What Every Life Science Teacher Should Know About Using Vertebrate Animals in the Classroom and in Science Projects discusses procurement and maintenance of animals accidents involving animals disposal of dead animals and diseases that can be transmitted from animals to humans Chapter 2 The 3 R s Reduction Refinement and
