Reimagining Clinical Legal Education Linden Thomas,Steven Vaughan,Bharat Malkani,Theresa Lynch,2018-10-04 Clinical Legal Education CLE can be defined in broad terms as the study of law through real or simulated casework It enables students to experience the law in action and to reflect on those experiences CLE offers an alternative learning experience to the traditional lecture seminar method and allows participants to take the study of law beyond the lecture theatre and library CLE has been a part of English law schools

for several decades and is becoming an increasingly popular component of a number of programmes. It is also well established in North America, Australia and many other countries around the globe. In some law schools CLE is credit bearing, in others it is an extracurricular activity. Some CLE schemes focus on social welfare law whilst others are commercially orientated. A number are run in conjunction with third sector organisations and many are supported by private practice law firms. This edited collection brings together academics, lawyers, third sector organisations and students to discuss the present experience and potential of CLE. As such it will be of interest to a wide and diverse audience both within and outside the UK.

The Long Walk to Equality Avis Whyte, Patricia Tuitt, Judith Bourne, 2024-02-20. In 1965 the UK enacted the Race Relations Act while the International Convention on the Elimination of all Forms of Racial Discrimination (ICERD) opened for signature and ratification. In the US the changes that brought down the walls of segregation, conveying some equality to black people, essentially began with the Civil Rights Act of 1964. These ground-breaking instruments marked a commitment domestically and internationally by the state parties to the ICERD to address racial injustice and inequality through legal means. Yet the intervening years reveal the challenges of pursuing racial justice and equality through the medium of law. In recent years allegations of institutional racism have been levelled against numerous public institutions in the UK while the rise of populism globally has challenged the ability of law to effect change. This edited collection draws attention to the need to reflect on the persistence of racial inequalities and injustices despite law's intervention and arguably because of its unconscious role in their promotion. It does so from a multiplicity of perspectives ranging from the doctrinal, socio-legal, critical and theoretical, thereby generating different kinds of knowledge about race and law. By exploring contemporary issues in racial justice and equality, contributors examine the role of law, whether domestic or international, hard or soft, in advancing racial equality and justice and consider whether it can effect substantive change.

Autotelic Architect Sumita Singha, 2016-07-01. *Autotelic Architect* explores how movements towards more self-initiated projects, greater collaboration and design activism have changed how architects and designers are practicing as well as the kinds of projects they are working on. Similar to the autotelic self that transforms potential problems into enjoyable challenges, the *Autotelic Architect* does not avoid societal changes but instead learns to harness their creative potential. Using new research and case studies from past and present, the author analyses the educational and professional implications of operating as a non-conventional, progressive, participatory design practice. Drawing on a range of global case studies of pioneering architects in the field, she reflects upon current and future trends at local, national and international level and additionally examines marketing and practical issues for architects. Illustrated with more than 30 black and white images, this is a compelling read for any practicing architect.
