Nominal Sizes 1½ to 5 Tons
[5.28 kW] to [17.6 kW]

ACHIEVER 12® HIGH EFFICIENCY HEAT PUMP OUTDOOR UNITS

The Ruud® UPMC- Achiever 12 Heat Pump Outdoor units can provide year-round heating and cooling comfort for residential, multi-family and light commercial applications. They are designed to operate with Ruud indoor units with cooling and heating capacities certified under the ARI Certification program.

The Ruud UBHC- and UBHK- Air Handlers equipped with auxiliary heating elements for supplementary heat was designed especially for use with the UPMC- Heat Pump. Together they provide systems capable of delivering a maximum HSPF (Heating Seasonal Performance Factor) of 8.65 in the heating mode or a maximum standard S.E.E.R. (Seasonal Energy Efficiency Ratio) of 13.85 in the cooling mode.

The following additional features, plus its energy-saving characteristics, make the UPMC- Heat Pump outdoor unit an excellent choice for new construction or upgrading your present system.

- Attractive, louvered wrap around jacket protects coil from weather extremes and yard hazards. Top grille is steel reinforced for extra strength. Cabinet is powder painted for all weather protection.
- Four sided outdoor coil design allows compressor operation with access panel removed.
- Air is discharged upward away from bushes and shrubs. The discharge pattern of the top grille provides minimum air restriction, resulting in quiet fan operation.
- Exclusive Combination Grille/Motor Mount* secures the fan motor to the underside of the discharge grille. The grille protects the motor windings and bearings from rain and snow.
- All controls are accessible by removing one service panel. Removable top grille provides access to the outdoor fan motor and outdoor coil.
- Compressor compartment offers additional protection from the elements and reduces operating noise.
- Single speed, 6-pole fan motor is designed for low speed, quieter, energy-saving operation.
- Non-cycling reversing valve and demand defrost.
