Soapbox Rebellion Matthew S. May, 2013-10-30 Soapbox Rebellion a new critical history of the free speech fights of the Industrial Workers of the World IWW illustrates how the lively and colorful soapbox culture of the Wobblies generated novel forms of class struggle From 1909 to 1916 thousands of IWW members engaged in dozens of fights for freedom of speech throughout the American West The volatile spread and circulation of hobo agitation during these fights amounted to nothing less than a soapbox rebellion in which public speech became the principal site of the struggle of the few to exploit the many While the fights were not always successful they did produce a novel form of fluid union organization that offers historians labor activists and social movement scholars a window into an alternative approach to what it means to belong to a union Matthew May coins the phrase Hobo Orator Union to characterize these collectives Soapbox Rebellion highlights the methodological obstacles to recovering a workers history of public address closely analyzes the impact of hobo oratorical performances and discusses the implications of the Wobblies free speech fights for understanding grassroots resistance and class struggle today in an era of the decline of the institutional business union model and workplace contractualism

Natural-Theological Understanding from Childhood to Adulthood Olivera Petrovich, 2018-09-13 It is commonly assumed that young children only begin to think about God as a result of some educational or cultural influence perhaps provided by their parents Natural Theological Understanding from Childhood to Adulthood asks if there is anything about God that children can know independently of any specific cultural input does their knowledge of God simply come from their everyday encounters with the surrounding world Whilst children s theoretical reasoning in biology physics and psychology has received considerable attention in recent developmental research the same could not be said about their religious or theological understanding Olivera Petrovich explores children s religious concepts from a natural theological perspective Using supporting evidence from a series of studies with children and adults living in as diverse cultures as the UK and Japan Petrovich explains how young children begin to construct their everyday scientific and metaphysical theories by relying on their own already advanced causal understanding The unique contribution that this volume makes to the developmental psychology of religion is its contention that religion or theology constitutes one of the core domains of human cognition rather than being a by product of other core domains and specific cultural inputs Natural Theological Understanding from Childhood to Adulthood is essential reading for students and researchers in cognitive developmental psychology religious studies education and cognitive anthropology

Reading Scripture in the Fellowship of the Spirit Trevor Reynolds, 2019-02-19 How does the Holy Spirit guide the Christian community in its custodianship and interpretation of Scripture How does the fact that the Spirit is characterized by koinonia impact upon this task In light of this do we read

Scripture with too much of an individualistic mindset In this new book Dr Trevor Reynolds addresses these questions seeking answers primarily from within Scripture itself He explores in depth what Jesus and the New Testament community taught concerning the interpretive role of the Holy Spirit How did they interpret Scripture with the help of the Spirit He highlights their corporate Spirit led hermeneutic with its challenge to our individualistic approaches The New Testament writers interpreted the Old Testament in a way that revealed communal methods of interpretation These were informed by Jewish pneumatic and corporate solidarity notions as reshaped by Jesus own Spirit given example and legacy In this book New Testament extracts are discussed which contain either specific examples of how Old Testament Scripture is interpreted by members of the New Testament community with the Spirit s help or speak of the Spirit s work of interpretation in a more general way Trevor Reynolds seeks to uncover their implications for biblical hermeneutics as well as for the doctrine use and custodianship of Scripture in the life and witness of the church today The book concludes by pointing to the wide ranging implications that reading Scripture in the fellowship of the Spirit poses for today s church

E.E. Cummings: Poetry and Ecology Etienne Terblanche, 2012-01-01 By employing the modernist devices of fragmentation recombination and accentuated blank space E E Cummings engages singularly with being on earth This ecological achievement was largely ignored by the New Critics and the subsequent semiotic spirit which has been holding that the sign hardly has to do with concrete existence on earth ironically perpetuated the neglect In this book Etienne Terblanche shows that Cummings s ecology relocates his oeuvre and status in contemporary discourse For the poet follows mimes and connects with the unfolding changes of earthly existence and growth what he views as the Tao of being in his lyricism sex poems satire and visual verbal poems This is true especially of the elusive manner or how of his poetry overall Careful ecocritical reading of this active culture nature integrity in his poetry brings about an imperative new understanding and placement of his project It further serves to show that in their different ways T S Eliot and Ezra Pound engage with nature in a similar way thus again accentuating the importance of Cummings s poetic project to the neglected and vital ecocritical perception of modernism in poetry

Shaping the History of Education? Jeroen Dekker, Frank Simon, 2018-02-05 In 1961 the Centre for the Study of the History of Education at Ghent University Belgium published the first issue of the multilingual journal *Paedagogica Historica* International Journal of the History of Education This book celebrates its fiftieth volume In fourteen contributions written by different generations of

historians of education it demonstrates that in an era where the history of education at university level is at risk both the journal and the discipline are pulsing and alive and kicking Was the journal a trendsetter or a follower and which position did it take with respect to the International Standing Conference for the History of Education These are questions addressed in the first section of this book In the second section a number of articles show national and transnational developments of the history of education In their diversity they make clear how the national and the transnational together characterize the discipline They show why journals in this domain should stimulate the development of broader concepts and theories in order to put national and regional cases in a broader scientific context and to make them attractive for international readership In the last section authors turn their minds to the future of the history of education They write about the shaping of new trends and about moving beyond borders focusing on among other things the challenge of neurosciences and of digital humanities

Patterns Marilyn Charles, 2013-06-17 In recent years various tributaries of psychoanalytic and developmental theory have flowed into our dawning understanding of the role of early sensory and affective experiences in the construction of our personal worlds In Patterns Building Blocks of Experience Marilyn Charles shows how such primary experiences coalesce into patterns those essential units of meaning that capture the unique subjectivity of each individual Frequently known by their prosody or affective melody patterns come to have profound meanings that we utilize in constructing basic notions of self and other Through pattern Charles holds we approach elusive meanings through dimensions of shape contour and affective resonance Such patterned understandings in turn become a mode of interchange through which we touch one another in ways that go beyond the overtly physical Analytic patients Charles finds have often led early lives too full of noise to use their early sensory and affective experiences constructively Such patients tend to live out patterns that operate unconsciously and have become literally incomprehensible Analytic communication by drawing explicit attention to such patterned experience provides new images that intrude on ingrained patterns of thinking about the self and other Out of the productive clash of analytically co constructed images and the invariant patterns of the past emerge new conceptions of what the patient may choose to be in the present moment Through it all Charles displays an admirable willingness to sit in difficult spaces and to work through troubling therapeutic impasses from the inside out rather than from some point of ostensible safety This finely textured and richly evocative study which grows out of Charles extensive clinical work with artists writers and musicians is a signal contribution to developmental theory clinical theory and the psychology of creativity **Legal**
