Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research *The Unmotivated Student to Master Student* Laquantis Chevis, 2018-07-19 As educators we don't always have the time to read as we would like This book was intended to be a quick read for that reason It was also intended to be used during professional developments to start the conversation of each topic covered and for you as an educator to evaluate your own thoughts about each topic This is your food for thought Unmotivated students can be master students Show them that you truly care and respect them and they will show you the master students they are You can do it I believe in you because you believe in your students **Algebra 1, Noteables: Interactive Study Notebook with Foldables** McGraw Hill, 2007-04-03 Noteables™ Interactive Study Notebook with Foldables™ is a complete note taking system with guided note taking for every lesson in a workbook format Plus vocabulary builder and a chapter test preparation section are included for every chapter *Every Math Learner, Grades 6-12* Nanci N.
