Pour Une Politique Climatique Globale:

Carbon constraint in the Mediterranean Louis Boisgibault, 2015 European Union's energy goals for 2020 inclusion of aviation in EU ETS since 2012 and the important increase of CO₂ emissions in Southern Mediterranean countries all justify to pay careful attention to the challenges of the carbon constraint at the Euro Mediterranean scale. The notion of carbon constraint stems from the application of the United Nations Framework Convention on Climate Change UNFCCC and from the Kyoto Protocol that resulted in the implementation of the EU ETS in European Union countries. Contrary to European countries that committed to emissions reductions goals Annex I countries of UNFCCC and Annex B countries of Kyoto Protocol, Southern and Eastern Mediterranean countries SEMC like other emergent countries apply the principle of common but differentiated responsibility that exempt them from adopting any binding emission reductions goals. The extension of the EU ETS with the auctioning of emission credits as of 2013 and the evolution even though difficult of international climate negotiations might nevertheless modify the situation of unbalanced commitments that prevails between Northern countries and Southern countries. section 1 Moreover if the carbon constraint for European countries remains today soft it might on a short or medium term generate several economic and social impacts and potentially on the regional trade. section 2 Several green initiatives undertaken on the Southern shore to develop environmental policies and new carbon market mechanisms have to be supported so as to limit these negative impacts and to implement a virtuous regional momentum. section 3

Pour Une Politique Climatique Globale Roger Guesnerie, 2010 **Pour une politique climatique globale** Roger Guesnerie, 2010 La 4^e de couverture indique partir d'une discussion sur le marché européen des droits de mission de gaz effet de serre et sur la taxe carbone la France cet opuscule examine les questions de politique climatique sous tous leurs aspects. IL revient longuement sur la question cruciale des instruments : taxe ou marché de droits exemptions pour faciliter une transition douce ajustements aux frontières. Ce faisant il souligne les enseignements tirés du savoir économique comme les contraintes posées par l'économie politique la lucidité limite dont témoigne le récent avis du Conseil constitutionnel sur la taxe carbone le lobbying pour la gratuité des quotas. La conception de l'architecture internationale est elle dominée par deux questions essentielles : les effets du dispositif sur les prix des combustibles fossiles la nécessaire intégration des pays en développement qui pour être gagnante doit renoncer à l'angélisme. Car l'accumulation d'initiatives locales ne peut être suffisante pour viter un dépasement rapide du plafond de CO₂ défini par les climatologues alors que le choc de Copenhague illustre les obstacles politiques un accord global efficace. Roger Guesnerie propose des voies pour surmonter ces blocages et concevoir ainsi une Realpolitik climatique globale. **Reducing Inequalities** Rémi Genevey, R. K. Pachauri, Laurence

Tubiana, 2013-01-01 The reduction of inequalities within and between countries stands as a policy goal and deserves to take centre stage in the design of the Sustainable Development Goals agreed during the Rio 20 Summit in 2012. The 2013 edition of A Planet for Life represents a unique international initiative grounded on conceptual and strategic thinking and most

importantly empirical experiments conducted on five continents and touching on multiple realities This unprecedented collection of works proposes a solid empirical approach rather than an ideological one to inform future debate The case studies collected in this volume demonstrate the complexity of the new systems required to accommodate each country's specific economic political and cultural realities These systems combine technical financial legal fiscal and organizational elements with a great deal of applied expertise and are articulated within a clear well understood growth and job generating development strategy Inequality reduction does not occur by decree neither does it automatically arise through economic growth nor through policies that equalize incomes downward via ill conceived fiscal policies Inequality reduction involves a collaborative effort that must motivate all concerned parties one that constitutes a genuine political and social innovation and one that often runs counter to prevailing political and economic forces

Radical Ecological Economics and Accounting to Save the Planet Jacques Richard, 2022-08-18 The solutions and tools generally offered to policymakers on environmental issues such as carbon pricing and environmental taxation most often emanate from neoclassical economists This book shows that the tools of these economists are ineffective for the job and must be replaced by methods from the sphere of ecological accounting The work has four main themes First the book provides a presentation and criticism of the tools traditionally proposed by neoclassical economists Adopting a historical perspective this section shows how these tools have evolved over time and explores some of the theoretical criticisms which have been leveled at them Second the book shows how mainstream economists have moved away from more pragmatic and efficient solutions because of their ignorance of the realities of management in particular corporate accounting and their ideologically driven desire to avoid attacking the capitalist model Third a toolkit of anti capitalist ecological accounting is outlined showcasing the distinct advantages of this approach for the environmental crises And finally the book considers the concrete possibilities of a rapid application of these new tools to combat the immediate threats we are facing The book will interest all readers who want to understand how anti capitalist ecological accounting can contribute to cooling and saving the planet in particular readers in ecological economics and accounting

Markets in the Making Michel Callon, 2021-12-07 Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of how everyday market activity gets produced If you're convinced you know what a market is think again In his long awaited study French sociologist and engineer Michel Callon takes us to the heart of markets to the unsung processes that allow innovations to become robust products and services *Markets in the Making* begins with the observation that stable commercial transactions are more enigmatic more elusive and more involved than previously described by economic theory Slicing through blunt theories of supply and demand Callon presents a rigorously researched but counterintuitive model of market activity that emphasizes what people designing products or launching startups soon discover the inherent difficulties of connecting individuals to things Callon's model is founded upon the notion of singularization the premise that goods and services must adapt and be adapted to the local milieu

of every individual whose life they enter Person by person thing by thing Callon demonstrates that for ordinary economic transactions to emerge en masse singular connections must be made Pushing us to see markets as more than abstract interfaces where pools of anonymous buyers and sellers meet Callon draws our attention to the exhaustively creative practices that market professionals continuously devise to entangle people and things Markets in the Making exemplifies how prototypes fragile curiosities that have only just been imagined are gradually honed into predictable objects and practices Once these are active enough to create a desired effect yet passive enough to be transferred from one place to another without disruption they will have successfully achieved the status of goods or services The output of this more ample process of innovation as redefined by Callon is what we recognize as the market commercial activity at scale The capstone of an influential research career at the forefront of science and technology studies Markets in the Making coherently integrates the empirical perspective of product engineering with the values of the social sciences After masterfully redescribing how markets are made Callon culminates with a strong empirical argument for why markets can and should be harnessed to enact social change His is a theory of markets that serves social critique

5 Crises Collectif, Philippe Askenazy, Daniel Cohen, 2013-04-03 Dans l'esprit des précédents ouvrages de cette collection les études coordonnées par Philippe Askenazy et Daniel Cohen analysent ici d'une façon souvent inattendue les cinq crises majeures auxquelles nous sommes confrontés toutes caractéristiques du désarroi du monde contemporain Crise des lites de la culture de la finance de la société et du climat les chercheurs du Cepremap se livrent un décryptage approfondi de thèmes dont les causes et les remèdes tissent des liens troits Du cumul des mandats au prix unique du livre des banques centrales l'économie politique du néolibéralisme en passant par l'évolution comparative des revenus des patrons et des ménages ce livre passionnant esquisse au-delà de l'approche strictement économique un tableau de la société la fois rudite et accessible qui aide mieux comprendre la crise Et les moyens d'en sortir

Comprendre les fondamentaux de l'économie Laurent Braquet, David Mourey, 2015 L'économie est partout présente dans nos sociétés Les sujets et les discours sur l'économie au sens large sont omniprésents dans les médias Qu'on le veuille ou non on ne peut y échapper Les activités économiques nous gouvernent autant que nous sommes acteurs de l'économie L'actualité économique est débordante mais difficile appréhender Les problèmes économiques se posent sans cesse Ils ont souvent plusieurs dimensions Les solutions sont complexes Les conseils sont nombreux mais souvent contradictoires Les décisions se multiplient dans tous les sens selon des intérêts souvent divergents Dans ces conditions comprendre le fonctionnement de nos économies s'avère incontournable
