Mobility Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change [Lessons from the Financial Crisis](#) Rob Quail,2010-06-08 The world s best financial minds help us understand today s financial crisis With so much information saturating the market for the everyday investor trying to understand why the economic crisis happened and what needs to be done to fix it can be daunting There is a real need and demand from both investors and the financial community to obtain answers as to what really happened and why Lessons from the Financial Crisis brings together the leading minds in the worlds of finance and academia to dissect the crisis Divided into three comprehensive sections The Subprime Crisis The Global Financial Crisis and Law Regulation the Financial Crisis and The Future this book puts the events that have transpired in perspective and offers valuable insights into what we must do to avoid future missteps Each section is comprised of chapters written by experienced contributors each with his or her own point of view research and conclusions Examines the market collapse in detail and explores safeguards to stop future crises Encompasses the most up to date analysis from today s leading financial minds We
