Office 2010 Address

Hussin A.Rothana

Office 2010 Address :

From the Ashes of History Adam B. Lerner, 2022 In recent years calls for reparations and restorative justice alongside the rise of populist grievance politics have demonstrated the stubborn resilience of traumatic memory From the transnational Black Lives Matter movement s calls for reckoning with the legacy of slavery and racial oppression to continued efforts to secure recognition of the Armenian genocide or Imperial Japan s human rights abuses international politics is replete with examples of past violence reasserting itself in the present But how should scholars understand trauma s long term impacts Why do some traumas lie dormant for generations only to surface anew in pivotal moments And how does trauma scale from individuals to larger political groupings like nations and states shaping political identities grievances and policymaking In *From the Ashes of History* Adam B Lerner looks at collective trauma as a foundational force in international politics a shock to political cultures that can constitute new actors and shape decision making over the long term As Lerner shows uncovering collective trauma s role in international politics is vital for two key reasons First it can help explain longstanding tensions between groups an especially relevant topic as scholars examine the transnational resurgence of nationalism and populism Second it pushes the discipline of International Relations to more completely account for mass violence s true long term costs particularly as they become embedded in longstanding structural inequalities and injustices While IR scholarship has largely dismissed non systematic latent phenomena like trauma Lerner argues that collective trauma can help draw the lines between international political groups and frame the logics of international political action Drawing on three historical cases that uncover the impact of collective trauma in Indian Israeli and American foreign policymaking *From the Ashes of History* demonstrates the broad utility of collective trauma as a theoretical lens for investigating how mass violence s legacy can resurge and dissipate over time

Obama, the Media, and Framing the U.S. Exit from Iraq and Afghanistan

Erika G. King, 2016-05-23 Situating Obama s end of war discourse in the historical context of the 2001 terrorist attacks *Obama the Media and Framing the U S Exit from Iraq and Afghanistan* begins with a detailed comparison with the Bush war on terror security narrative before examining elements of continuity and change in post 9 11 elite rhetoric Erika King deftly employs two case studies of presidential and media framing the weeks surrounding the formal announcements of Obama s December 2009 surge then exit strategy from Afghanistan and the end of combat operations in Iraq in August 2010 to explore the role of mass media in presenting presidential narratives of war and finds evidence of an interpretive disconnect between the media and a president seeking to present a more nuanced approach to keeping America safe Eloquently scrutinizing Obama s discourse on the U S exit from two post 9 11 wars and contrasting the presidential endgame frame with the U S mainstream media s narratives of the wars meaning accomplishments and denouement provides a unique combination of qualitative content analysis and topical case studies and makes this volume an ideal resource for scholars and researchers grappling with the complicated and ever evolving nexus of war the president and the media

Counting Like a State Philip Rocco,2025-06-17 The census plays a foundational if all too easily ignored role in the operation of the American state shaping everything from congressional representation to the allocation of trillions of federal dollars While census taking aspires to the high modernist goal of seeing like a state centralizing standardizing and homogenizing knowledge about a polity it is subject to far more conflict and negotiation than final tabulations maps or technical documentation make apparent This is especially true in a large decentralized polity like the United States where the Constitution entrusts the ultimate authority for the census in the legislative branch In *Counting Like a State* Philip Rocco shows how the production of the US Census now crucially hinges not only on what happens in Washington but also on a series of intergovernmental partnerships State and local officials though not formally responsible for census taking figure importantly in the implementation of the decennial count These officials are essential partners in the construction and maintenance of address lists as well as in outreach and promotion campaigns in

hard to count communities The 2020 Census compounded these challenges with new crises Intergovernmental partnerships played a key role in preventing President Trump from adding a citizenship question as state and local officials mounted a coordinated legal counteroffensive Many local officials also simply refused to cooperate with the Trump administration s efforts to exclude undocumented immigrants from the apportionment count The census also took place in the context of a global pandemic that stretched administrative resources to the breaking point While these partnerships allowed the Census Bureau to adapt to ever changing conditions on the ground state and local governments also sounded the alarm when the Trump administration sought to rush the census These efforts helped preserve the quality of the data collected in the 2020 count Rocco s illuminating study of the 2020 Census pulls back the curtain on the administrative state to reveal how something as complex and centralizing as a census takes place within a decentralized federalist system Drawing on analyses of interviews with hundreds of public officials and quantitative analyses of state and local census activities Counting Like a State allows scholars and practitioners to better understand what facilitates as well as what impedes effective intergovernmental partnerships for census taking

Bending History Martin S. Indyk, Kenneth G. Lieberthal, Michael E. O'Hanlon, 2012-02-24 By the time of Barack Obama s inauguration as the 44th president of the United States he had already developed an ambitious foreign policy vision By his own account he sought to bend the arc of history toward greater justice freedom and peace within a year he was awarded the Nobel Peace Prize largely for that promise In Bending History Martin Indyk Kenneth Lieberthal and Michael O Hanlon measure Obama not only against the record of his predecessors and the immediate challenges of the day but also against his own soaring rhetoric and inspiring goals Bending History assesses the considerable accomplishments as well as the failures and seeks to explain what has happened Obama s best work has been on major and pressing foreign policy challenges counterterrorism policy including the daring raid that eliminated Osama bin Laden the reset with Russia managing the increasingly significant relationship with China and handling the rogue states of Iran and North Korea Policy on resolving the Israeli Palestinian conflict however has reflected serious flaws in both strategy and execution Afghanistan policy has been plagued by inconsistent messaging and teamwork On important softer security issues from energy and climate policy to problems in Africa and Mexico the record is mixed As for his early aspiration to reshape the international order according greater roles and responsibilities to rising powers Obama s efforts have been well conceived but of limited effectiveness On issues of secondary importance Obama has been disciplined in avoiding fruitless disputes as with Chavez in Venezuela and Castro in Cuba and insisting that others take the lead as with Qaddafi in Libya Notwithstanding several missteps he has generally managed well the complex challenges of the Arab awakenings striving to strike the right balance between U S values and interests The authors see Obama s foreign policy to date

Fear, Power, and Politics Mary Cardaras, 2013-05-16 The Iraq War of March 19 2003 was an implausible war at the outset We now understand that it could have been averted and never should have been waged How and why did it begin Who was

responsible This book offers a new perspective on the Iraq War and explains the dynamic relationships between the George W Bush administration the United States Congress and the national news media It is based on the multiple streams model of political change by John Kingdon which says that if a unique combination of political policy and problem streams collide under the right circumstances they can create a window of opportunity for a shift in policy It was the terrorist attacks of September 11 2001 which set the stage for the emergence of three dynamic streams in the country Fear power and a contentious political climate converged to produce not only a dramatic new foreign policy but also a war with Iraq a country which had not provoked or threatened the United States Fear power and a tense political climate also influenced institutional behavior and exposed the failures of 1 The executive branch in the administration of George W Bush 2 The United States Congress and 3 the national news media All are designed and are differently responsible to protect the interests of the American people Errors in judgment have happened throughout history with other administrations with other Congresses and with the news media However with regard to the Iraq War it was a matter of degree and extent especially for the President of the United States Both the Congress and the news media were also experiencing colossal institutional changes which influenced and hindered their performances However all were culpable in helping to create the Iraq war which today stands as one of the longest military conflicts in United States history
