Blood-Ryan,1865 **A History of Scientific Journals** Aileen Fyfe,Noah Moxham,Julie McDougall-Waters,Camilla Mørk Røstvik,2022-10-03 Modern scientific research has changed so much since Isaac Newton s day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton s day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton s optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society s comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history Journal of Geophysics ,1929 *The Shipley collection of scientific papers* ,1918 *The Glasgow University Calendar* University of Glasgow,1927 **United States Government Publications Monthly Catalog** ,1949 Forced Migration and Scientific Change Mitchell G. Ash,Alfons Söllner,David Lazar,2002-06-06 The dismissal of civil servants on racist or political grounds in April 1933 marked the beginning of a massive forced exodus of mainly Jewish scholars and scientists from Nazi Germany a phenomenon unprecedented in the modern history of academic life The essays in this volume examine whether that exodus of reason lead to significant scientific change and if so how that change should be characterised The volume challenges the focus of earlier work on the intellectual migration on losses for German science and gains for British and American science Instead the authors proceed from the

assumption that the sciences are open dynamic and historically contingent systems and explore the multiple complex interactions of biographical social and cultural circumstances with changes or lack of change in the migr s scientific thinking and research
