Physical Science Paper 1 exemplar And Memorandum Grade 2014:

Explanatory Models, Unit Standards, and Personalized Learning in Educational Measurement William P. Fisher Jr., Paula J. Massengill, 2022-10-15 The papers by Jack Stenner included in this book document the technical details of an art and science of measurement that creates new entrepreneurial business opportunities Jack brought theory instruments and data together in ways that are applicable not only in the context of a given test of reading or mathematics ability but which more importantly catalyzed literacy and numeracy capital in new fungible expressions Though Jack did not reflect in writing on the inferential constructive processes in which he engaged much can be learned by reviewing his work with his accomplishments in mind A Foreword by Stenner's colleague and co author on multiple works William P Fisher Jr provides key clues concerning a how Jack's understanding of measurement and its values aligns with social and historical studies of science and technology and b how recent developments in collaborations of psychometricians and metrologists are building on and expanding Jack's accomplishments This is an open access book

Breaking Point Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II Breaking Point is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author's personal interviews and correspondence over years with key psychiatric and military policymakers it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations Ultimately 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds Never before or since has the United States engaged in such a program In designing Selective Service Medical Circular No 1 psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening's validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly

because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected

Child Development at the Intersection of Race and SES, 2019-07-02 Child Development at the intersection of Race and SES Volume 57 in the Advances in Child Development and Behavior series presents theoretical and empirical scholarship illuminating how race ethnicity and socioeconomic status intersect to shape children s development and developmental contexts Important chapters in this new release include the Implications of Intersecting Socioeconomic and Racial Identities for Academic Achievement and Well being The home environment of low income Latino children Challenges and opportunities Profiles of race ethnicity and socioeconomic status Implications for ethnic racial identity discrimination and sleep Youths sociopolitical perceptions and mental health Intersections between race class and gender and much more Rather than focusing on the additive effects of race ethnicity and SES which is typical and a limitation in the developmental literature the scholarship in this book considers how the factors and processes shaping the development of children of color can differ markedly across the socioeconomic continuum This collection illustrates how applying an intersectional lens to developmental science can yield unique insights into the challenges confronting and assets buoying both minority and majority children s healthy development
