Plantronics CS50/CS55 wireless headset systems combine the clarity of traditional corded technology with the mobility of wireless, so employees can move around the office to wherever business takes them—without interrupting or missing a call.

Continuing our tradition as a technology leader, Plantronics presents CS55 as the first headset in the United States to implement 1.9GHz voice-dedicated wireless technology, while the CS50 operates at a frequency of 900 MHz.

## CS50/CS55 Benefits

- Mobile multi-tasking—confering with colleagues, walking to the printer, pouring a cup of coffee—need not interrupt important calls up to 300 feet from a desk phone.
- The CS50/CS55 gives workers 10 hours of unencumbered talk time and the option of remote answering\*, so they never miss calls when away from the workstation.
- An extended boom and noise-canceling microphone filter out background sounds for heightened speech clarity.
- Delivers the audio quality of corded headsets—without the tether.
- The clear audio leader: the CS55 is the first headset in the U.S. to offer voice-dedicated 1.9 GHz DECT wireless technology.
- Employees can answer, end, and mute calls on the headset with the touch of a button.
