Effects of Medium-Switching on Secondary School Students' Learning Endalew Kufi,2013-10-19 Television constitutes an important medium widely used to disseminate information to its viewers It has the unique feature of combining audio and visual technology and is thus considered to be more effective than audio media It serves multiple purposes of entertainment information and education In terms of the latter it helps in providing discovery learning and stimulates cognitive development of its viewers The findings indicate that although televised lessons were very rich a lack of audio visual media skills among students and a lack of entry level support and integration were obstacles to the effective use of the televised medium for instructional purposes Students did not receive adequate audio visual preparation

both prior to and at the entry into general secondary education Furthermore teachers did not receive focused training to develop skills as facilitators
