America's Lab Report National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on High School Laboratories: Role and Vision, 2005-12-20 Laboratory experiences as a part of most U S high school science curricula have been taken for granted for decades but they have rarely been carefully examined What do they contribute to science learning What can they contribute to science learning What is the current status of labs in our nation s high schools as a context for learning science This book looks at a range of questions about how laboratory experiences fit into U S high schools What is effective laboratory teaching What does research tell us about learning in high school science labs How should student learning in laboratory experiences be assessed Do all student have access to laboratory experiences What changes need to be made to improve laboratory experiences for high school students How can school organization contribute to effective laboratory teaching With increased attention to the U S education system and student outcomes no part of the high school curriculum should escape scrutiny This timely book investigates factors that influence a high school laboratory experience looking closely at what currently takes place and what the goals of those experiences are and should be Science educators school administrators policy makers and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished

Dynamical Geology of Salt and Related Structures I. Lerche, 2017-09-29 Dynamical Geology of Salt and Related Structures deals with many aspects of the dynamical evolution of salt bodies in sedimentary basins This book consists of four major sections Section A deals with salt dynamics and the motion of salt The impact of a mobile salt mass on the structural development of the overlying formations is considered in Section B while the development of caprock which is commonly found overlying salt diapirs is emphasized in Section C The last section deliberates the interrelationships between fluid flow salt dissolution and heat flow in the vicinity of a salt diapir including the connections with maturation of source

rocks migration and trapping of hydrocarbons in salt related structures This publication is valuable to professional geoscientists interested in processes involved in salt dynamics
