safety Professor Way Kuo in the Foreword to Design and Manufacturing Practices for Performability Engineering There are several aspects involved when evaluating a system s performance such as reliability cost quality safety maintainability risks and performance related characteristics Performability engineering provides a unified framework for integrating these aspects in a quantified manner enabling informed decisions about a system However this field faces the daunting task of unifying diversified disciplines and theories that address issues such as quality reliability availability maintainability and safety QRAMS as well as engineering characteristics statistical data analysis multi criteria decision making and applications of deep and machine learning This book documents the latest ideas presented by world leaders in the QRAMS domain Through diverse chapters this volume represents the vitality of QRAMS in performability engineering Design and Manufacturing Practices for Performability Engineering serves as a useful resource for practicing engineers and researchers pursuing this challenging and relevant area for sustainable development Readers will find the book Describes network reliability measures and algorithms to evaluate them in an easily understandable manner Introduces the notion of global cuts and their applications to evaluate reliability measures and flow network reliability and provides a general framework for reliability evaluation Serves as a valuable reference and primer in the area of network reliability Offers up to date research in the field of network reliability Audience Researchers and educators of reliability engineering electrical computer science electronics and communication engineering with their associated allied areas Industry analysts and design engineers of engineering systems will also find this book valuable International Law and Weapons Review Natalia

Jevglevskaja,2021-12-16 International law requires that before any new weapon is developed purchased or modified the legality of its use must be determined This book offers the first comprehensive and systemic analysis of the law mandating such assessments Article 36 of the 1977 Additional Protocol I to the Geneva Conventions Underpinned by empirical research the book explores the challenges the weapons review authorities are facing when examining emerging military technology such as autonomous weapons systems and autonomous cyber capabilities It argues that Article 36 is sufficiently broad to cover a wide range of military systems and offers States the necessary flexibility to adopt a process that best suits their organisational demands While sending a clear signal that law should not simply follow technological developments but rather steer them the provision has its limits however which are shaped and defined by the interpretative decisions made by States

**Emerging Legal Orders in the Arctic** Akiho Shibata,Leilei Zou,Nikolas Sellheim,Marzia Scopelliti,2019-04-11 More than ever before the changing environmental and political landscape in the Arctic requires stability and foreseeability based on resilient common norms The emerging legal orders in the Arctic cannot be legitimately created or effectively implemented unless all relevant actors are involved Simultaneously it must always be based on respect for the sovereign rights of the eight Arctic states in the region as well as the tradition and cultural livelihood of the local communities It is this delicate balance between Arctic and non Arctic interests that is the core probl matique for the emerging legal orders in the Arctic Emerging

Legal Orders in the Arctic critically examines the role of non Arctic actors in this advancement of the shape and scope of the Arctic legal order. Discussing the admittance and participation of Observer states and organisations in the Arctic Council including task force meetings where new treaties are negotiated it details the issues and successes this can result in. Setting up the context of the current legal orders in the Arctic the book discusses Asian indigenous and European perspectives amongst others. There is a strong focus on the groundbreaking fisheries agreement of November 2017 in the Central Arctic Ocean CAO and the impact on both Arctic and non Arctic actors. Interests in marine living resources, scientific cooperation and the Arctic shipping regimes and governance are also thoroughly discussed from multiple perspectives. The book combines the expertise of academics and practitioners in the fields of international law and Arctic governance uniquely focusing on Asian actors in the Arctic legal order making the resulting study a fascinating insight into the interplay between non Arctic actors and the Arctic legal order and will be invaluable to academics in the field of Arctic and international law.

**Uganda** International Monetary Fund. Fiscal Affairs Dept., 2017-09-15. This Technical Assistance Report discusses measures to strengthen cash management in Uganda. It recommends establishing a high level cash management committee to provide the necessary authority to the Cash Policy Department (CPD) in maintaining its relationships in constantly improving the cash flow forecasts and in operating active cash management transactions. In the medium term when cash flow forecasting has gained sufficient accuracy the CPD must prepare for active cash management operations which will consist of short term borrowing and investment. An appropriate cash buffer level also needs to be calculated which will define the necessary money market transactions to smooth government cash operations.
