**Handbook of Tissue Optical Clearing** Valery V. Tuchin, Dan Zhu, Elina A. Genina, 2022-02-08 Biomedical photonics is currently one of the fastest growing fields connecting research in physics optics and electrical engineering coupled with medical and biological applications It allows for the structural and functional analysis of tissues and cells with resolution and contrast unattainable by any other methods However the major challenges of many biophotonics techniques are associated with the need to enhance imaging resolution even further to the sub cellular level as well as translate them for in vivo studies The tissue optical clearing method uses immersion of tissues into optical clearing agents OCAs that reduces the scattering of tissue and makes tissue more transparent and this method has been successfully used ever since This book is a self contained introduction to tissue optical clearing including the basic principles and in vitro biological applications from in vitro to in vivo tissue optical clearing methods and combination of tissue optical clearing and various optical imaging for diagnosis The chapters cover a wide range of issues related to the field of tissue optical clearing mechanisms of tissue optical clearing in vitro and in vivo traditional and innovative optical clearing agents recent achievements in optical clearing of different tissues including pathological tissues and blood for optical imaging diagnosis and therapy This book provides a comprehensive account of the latest research and possibilities of utilising optical clearing as an instrument for improving the diagnostic effectiveness of modern optical diagnostic methods The book is addressed to biophysicist researchers graduate students and postdocs of biomedical specialties as well as biomedical engineers and physicians interested in the development and application of optical methods in medicine Key features The first collective reference to collate all known knowledge on this topic Edited by experts in the field with chapter contributions from subject area specialists Brings together the two main approaches in immersion optical clearing into one cohesive book

**Extremisms in Africa Volume 2** Alain Tschudin, Craig Moffat, Stephen Buchanan-Clarke, Susan Russell, Lloyd Coutts, 2019-06-18

Over the past two decades, the rapid emergence and spread of both local and transnational extremist organizations has become a primary source of insecurity in Africa. Extremist organizations represent the fluid and variable nature of conflict systems today and are at the heart of some of Africa's most enduring conflicts. Moreover, the inability of African states to contain the threat of extremism or of heavy-handed security responses has led to the loss of thousands of lives, displaced millions, and deeply impacted the continent's democratisation and development goals. This is the second anthology published by Good Governance Africa (GGA) on the topic of extremism and political violence in Africa. *Extremisms in Africa*, one of the first anthologies of its kind on this topic to be authored and published on the African continent, provided an account of how extremist groups arose in Africa and the various ways in which they have harnessed their global agendas to local conflict dynamics and structural challenges, enabling them to exploit the grievances of individuals and communities for their cause. This anthology, *Extremisms in Africa Volume 2*, looks forward, giving special attention to the ways in which emergent trends in global geopolitics and conflict dynamics merge to impact upon the African continent. To this end, we have sought to engage diverse topics ranging from ecological concerns surrounding climate change and migration, the implications of such human movement for modern-day trafficking and slavery, and the roles of women and youth. State responses to extremism on the African continent are not uniform; the capacity of individual states to detect, identify, police, investigate, and prosecute is highly variable. At the most fundamental level, extremism is ripe to arise in contexts where governments are failing, especially when democracy is on the wane. This anthology identifies some of the most pressing challenges in addressing extremism today and provides chapters that could offer actionable policy insights to governments and civil society. Given the nature of Africa's geopolitical landscape, state and security services alone cannot prevent extremism. It will take a whole-of-society approach where government, civil society, academia, communities, families, and individuals collaborate to better understand the local dynamics of recruitment and radicalisation and develop context-

specific strategies in response This anthology will hopefully provide practitioners with improved insight into some of the key challenges and potential solutions in preventing extremism while also being of interest to the general reader
