Hitmen for Hire Mark Shaw,2017-07-10 Hitmen for Hire takes the reader on a journey like no other navigating a world of paid hitmen informers rogue policemen criminal taxi bosses gang leaders and crooked politicians and businessmen Criminologist Mark Shaw examines a society in which contract killings have become commonplace looking at who arranges hits where to find a hitman and even what it is like to operate as a hitman or woman Since 1994 South Africa has seen a worrying increase in the commercialisation of murder and has been rocked by several high profile contract killings Drawing on his research of over a thousand incidents of hired assassinations from 2000 to 2016 Shaw reveals how these murders are used to exert a mafia type control over the country s legal and illegal economic activity Contracted assassinations and the organised criminal activity behind them contain sinister linkages with the underworld most visibly in relation to disputes over tenders and access to government resources State security actors increasingly mediate relations between the under and upper worlds with serious implications for the long term success of the post apartheid democratic project

Bounded Rationality and Behavioural Economics Graham Mallard,2015-08-14 Economics Nobel Laureate Herbert Simon developed the concept of bounded rationality in the 1950s This asserts that the cognitive abilities of human decision makers are not always sufficient to find optimal solutions to complex real life problems leading decision makers to find satisfactory sub optimal outcomes This was a foundational component of the development of Behavioural Economics but in recent years the two fields have diverged each with its own literature its own approach and its own proponents Behavioural Economics explores the areas of commonality between Economics and Psychology in terms of its focus and its approach whereas the bounded rationality literature largely analyses the implications of sub optimal decision making through the mathematically sophisticated methodology of mainstream Economics This book examines the nature and consequences of this divergence and questions whether this is a case of beneficial specialisation or whether it is unhelpful potentially stunting the development of some aspects of Economics It has been suggested that the major deficiency of Behavioural Economics is that it has failed to produce a single widely applicable alternative to constrained optimisation This book evaluates the extent to which this is the true and if it is the extent to which it is a product of the divergence between the two literatures It also seeks to identify commonalities between the two subjects and suggests avenues of research in Economics that would benefit

from a re fusion of these two fields *AQA Business for A Level 2* Malcolm Surridge, Andrew Gillespie, 2015-11-06 Exam Board AQA Level AS A level Subject Business First Teaching September 2015 First Exam June 2017 This textbook has been fully revised to reflect the 2015 AQA Business specification giving you up to date material that supports your teaching and student s learning Builds up quantitative skills with Maths moment features and assesses them in the end of chapter activities Ensures students have the knowledge of real life businesses so they can apply their theoretical understanding with the Business in focus feature Helps students get to grips with the content and tests key skills with activities at the end of every chapter Asian Worlds in Latin America Stefania Paladini, 2015-12-22 There has been increasing Asian interest in Latin America in recent years beginning with Japanese investment in the 1980s and continuing into the present decade when there is growing investment by China This book examines the nature and extent of Asian business and related activity in Latin America It shows how investment is not just from Japan and China with Korea and India also involved and with Taiwan directly competing with China It explores activity in the minerals and energy sector and also in trade and other areas It demonstrates how Asian activity has a wide impact on the countries of both South America and the Caribbean making them less exclusively the United States backyard how different countries are affected differently by Asian activity and how the growing links with Asia increasingly open up the possibility of greater Latin American activity in Asia **The Political Economy of Euro-Mediterranean Relations** Christos Kourtelis, 2015-08-06 The author analyses the implementation of the agricultural and industrial parts of the European Neighbourhood Policy ENP in Egypt Tunisia and Morocco Following a sectoral approach to assess the implementation of the ENP he investigates which interest groups win and which lose from the policy **Contract Governance** Stefan Grundmann, Florian Möslin, Karl Riesenhuber, 2015-07-23 This book introduces and develops Contract Governance as a new approach to contract theory While the concept of governance has already been developed in Williamson s seminal article it has ironically not received much attention in general contract law theory Indeed Contract Governance appears to be an important and necessary complement to corporate governance and in fact as the second equally important pillar of governance research in the core of private law With this in mind Grundmann M slein and Riesenhuber provide a novel approach in setting an international and interdisciplinary research agenda for developing contract law scholarship Contract Governance focuses particularly on the ways in which a governance perspective leads to research questions that have been neglected in traditional contract law scholarship and how from a governance perspective the questions are dealt with in a different manner and style Combining substantive chapters and commentaries this collection of essays addresses an array of topics including third party impact and contract governance problems in herd behaviour governance of networks of contracts governance in long term contractual relationships contract governance and rule setting and contract governance and political dimensions **Common European Legal Thinking** Hermann-Josef Blanke, Pedro Cruz Villalón, Tonio Klein, Jacques Ziller, 2015-09-24 Common European Legal Thinking emanates from the existence of a

shared European legal culture as especially reflected in the existence of a common European constitutional law. It denotes a body of individual constitutional principles written and unwritten that represent the common heritage of the constitutions of the Member States. Taking into account the two major European organisations the Council of Europe and especially the European Union, the essays of this Festschrift discuss a range of constitutional principles including the rule of law, democracy and the exercise of political power in a multilevel system which recognises fundamental rights as directly applicable and supreme law. Other essays examine the value of pluralism, the commitment of private organisations to uphold public values, principles or rules and the objectives and methods of a transnational science of administrative law. These articles highlight the fact that the *Ius Publicum Europaeum Commune* is politically in the making which can often be seen in the shape of general legal principles. The publication recognises the role of Albrecht Weber as a forerunner of Common European Legal Thinking.

The Images of the Consumer in EU Law Dorota Leczykiewicz, Stephen Weatherill, 2016-01-28. This book consists of contributions exploring from different perspectives the images of the consumer in EU law. The images of the consumer form the foundation for various EU policies more or less directly oriented towards the goal of consumer protection. The purpose of the volume is to establish what visions of the consumer there are in different contexts of EU law, whether they are consistent and whether EU law's engagement with consumer-related considerations is sincere or merely instrumental to the achievement of other goals. The chapters discuss how consumers should be protected in EU contract, competition, free movement and trade mark law. They reflect on the limits of the consumer empowerment rationale as the basis for EU consumer policy. The chapters look also at the variety of concerns consumers might have including the cost of goods and services, access to credit, ethical questions of consumption, the challenges of excessive choice and the possibility to influence the content of regulatory measures and explore the significance of these issues for the EU's legislative and judicial process.
