Designed for both students and teachers who should have parity of involvement in developing and using rubrics, this book covers the problematic issues of assessment in schools while offering readers practical solutions to navigating the ensuing tensions and dilemmas. The notion that rubrics may hinder assessment transparency is also discussed with examples to warn against uncritical use of rubrics that may discipline rather than help learners. The perspective of a school leader in providing assessment leadership to rubrics usage across a school is included for extending awareness of rubrics beyond classroom contexts. This provides an informed approach for teachers to understand the stakes and complexities involved in judging learning and learners whilst offering concrete options and suggestions to consider. Shute, Betsy Jane Becker, 2010-09-08. In today's rapidly changing and information-rich world, students are not acquiring adequate knowledge and skills to prepare them for careers in mathematics, science, and technology with the traditional approach to assessment and instruction. New

competencies e.g. information communication and technology skills are needed to deal successfully with the deluge of data. In order to accomplish this new educationally valuable skills must be acknowledged and assessed. Toward this end the skills we value and support for a society producing knowledge workers not simply service workers must be identified together with methods for their measurement. Innovative Assessment for the 21st Century explores the faces of future assessment and asks hard questions such as: What would an assessment that captures all of the above attributes look like? Should it be standardized? What is the role of the professional teacher?
