Essential Concepts of Occupation for Occupational Therapy Charles Christiansen, Kristine Haertl, 2023-11-30

Essential Concepts of Occupation for Occupational Therapy is an accessible introduction to vital concepts in occupational science for the occupational therapy practitioner or student. It invites therapists to view and understand their clients differently by using an occupational lens to focus on the lives of their clients as everyday doers. It addresses the key questions at the heart of understanding humans as occupational beings: What do people typically do? And where, when, how, why, and with whom do they do it? These questions organize the key concepts from occupational science that form the first chapters of this book, enabling therapists to better understand their clients and enabling their clients to better understand the importance of occupation to their well-being. Additional chapters clearly describe how therapists can use occupation-based models to apply an expanded view of occupation and make evaluation and intervention more relevant and beneficial to their clients. A final chapter examines trends and lifestyle changes occurring in the 21st century to anticipate how these might impact future

practice Through use of engaging and thoughtful cases that illustrate many of the concepts this guide will help practitioners clearly understand their clients as doers while also providing enhanced ways for therapist to confidently apply these concepts in practice
