

Quantum DXi6900 User Essentials

Review this document after your DXi6900 system has been installed. It will help you become familiar with your system. However, this document is not a substitute for the DXi6900 User's Guide or for Quantum training.

Documentation and Training

For information on configuring, operating, and maintaining your DXi6900, open a Web browser and go to www.quantum.com/dxi6900help. You will find product documentation, best practice guides, how-to videos, and other product resources.

For information about available training courses, go to www.quantum.com/ServiceandSupport/StorageCare/learning/index.aspx.

Licensed Features

On the DXi GUI, go to **Utilities > License Keys** and review the licensed features:

Pre-installed features:

- **Network Attached Storage (NAS):** One of the options for presenting the DXi6900 to the host.
- **OpenStorage Technology (OST):** One of the options for presenting the DXi6900 to the host. Specific versions of NetBackup and Backup Exec are required. For more details, refer to the *DXi-Series: NetBackup and Backup Exec OST Configuration Guide* (www.quantum.com/DXi6900docs).
- **Virtual Tape Library (VTL):** One of the options for presenting the DXi6900 to the host when a Fibre Channel card is installed. This license is for 160 virtual tape drives.
- **Backup Application Specific Path-to-Tape:** Provides the ability to move data to physical tape cartridges in an attached tape library, using a Fibre Channel connection.
- **Deduplication:** Enables data deduplication.
- **Replication:** Enables replication to other DXi systems.
- **Data-in-Flight Encryption:** Enables use of AES encryption (128-bit or 256-bit) when sending data to another system. (Not available in all regions.)

Licensed features included as a license certificate (these features require enabling for use):

- **Data-at-Rest Encryption:** For systems with SED-capable drives, the Data-at-Rest encryption license may be installed. (Not available in all regions.)
- **Storage Capacity:** The default storage capacity of 17 TB is a pre-installed feature. Increased storage capacity (in 17-TB increments) can be installed through a combination of additional storage modules and storage license certificates.

System Serial Number

If you contact Quantum Support, you will need your system serial number. To locate the system serial number from the GUI, look at the Home page of the Remote Management Console. It is also located on the information tab that pulls out from the node front panel.

The system serial number includes the letters **BYW**. An example system serial number is **AY1238BYW11450**.

To enable some licensed features, you will need a license certificate and the system serial number (DXi6900 User's Guide, "License Keys" section).

Hardware

- Additional storage is provided through expansion modules (EBODs) associated with array modules (RBODs). All DXi6900 systems have at least one array module.
- Identify the ports on the node (these may vary depending upon selected options), array modules, and expansion modules.
- Identify the LEDs on the node, array modules, and expansion modules.
- Identify the disk drives. DXi6900 systems use hard disk drives (HDDs) in the node for the operating system, system software, and metadata. The HDDs in the storage arrays are used for bulk data storage. All drives are hot swappable, provided that they are replaced one at a time, and RAID is allowed to rebuild after each replacement.

Office Series 9000 Manual

Lingjun Ying

Office Series 9000 Manual:

The United States Government Manual ,2003 **The United States Government Manual** United States.
