Homeland Security James J. F. Forest, 2006-06-30 America is a target the homeland is under threat While Americans have been targets of terrorist attacks for quite some time September 11 2001 awoke the nation to the reality that we are vulnerable in our homes our places of work and worship and our means of public transportation And yet we must continue to function as best we can as the world's most vibrant economic and political community The current threat environment requires greater engagement with the public as the necessary eyes and ears of the nation's homeland security infrastructure However to be effective the public must be equipped with the knowledge of where and why specific locations and activities may be a terrorist target what is being done to protect those targets and how they can help This three volume set answers that need The chapters of each volume of Homeland Security revolve around a core of central questions Are we safer today than we were pre 9 11 What steps have been taken in all these areas to protect ourselves What are the threats we face and what new threats have developed since 9 11 Are we staying one step ahead of those who wish to do us harm In 2002 more than 400 million people 122 million cars 11 million trucks 2 4 million freight cars and 8 million containers entered the United States Nearly 60 000 vessels entered the United States at its 301 ports of entry Clearly the amount of activity this represents will require a long term commitment to innovation organizational learning and public vigilance to complement an already overstretched network of government agencies and security professionals

The Political Economy of Managed Migration Georg Menz, 2010-12-16 European governments have re discovered labour migration but are eager to be perceived as controlling unsolicited forms of migration especially through asylum and family reunion The emerging paradigm of managed migration combines the construction of more permissive channels for desirable

and actively recruited labour migrants with ever more restrictive approaches towards asylum seekers Non state actors especially employer organizations trade unions and humanitarian non governmental organisations attempt to shape regulatory measures but their success varies depending on organizational characteristics Labour market interest associations lobbying strategies regarding quantities and skill profile of labour migrants will be influenced by the respective system of political economy they are embedded in Trade unions are generally supportive of well managed labour recruitment strategies But migration policy making also proceeds at the European Union EU level While national actors seek to upload their national model as a blueprint for future EU policy to avoid costly adaptation top down Europeanization is re casting national regulation in important ways notwithstanding highly divergent national regulatory philosophies Based on field work in and analysis of primary documents from six European countries France Italy United Kingdom Ireland Germany and Poland this book makes an important contribution to the study of a rapidly Europeanized policy domain Combining insights from the literature on comparative political economy Europeanization and migration studies the book makes important contributions to all three while demonstrating how migration policy can be fruitfully studied by employing tools from mainstream political science rather than treating it as a distinct subfield

Parliamentary Papers Great Britain. Parliament. House of Commons,1913 **Global Governance and Rules for the Post-2015 Era** Jose Antonio Alonso,José Antonio Ocampo,2015-08-27 This book is available as open access through the Bloomsbury Open Access programme and is available on bloomsburycollections.com Attention is increasingly being paid to the conceptualization of the sustainable development agenda that should guide global development efforts beyond 2015 New trends are shaping the international environment suggesting that the world emerging from the recent economic and financial crisis will probably be very different from the one we have known so far The emerging issues demand new concerted responses and new international efforts which will have to be framed by new rules and more democratic and inclusive mechanisms of global governance Global Governance and Rules for the Post 2015 Era provides a unique assessment of global rules and governance a reflection of how global rules have been shaping development experiences and outcomes an identification of the shortcomings of current global governance mechanisms and innovative suggestions for reforming and improving them The various chapters analyse whether current rules and governance structures enables the building of effective responses against international problems and promote a fair distribution of development opportunities among countries This book is a timely contribution to the discussions on a new global development agenda undertaken under the leadership of the United Nations It reflects the outcome of a research programme by a group of independent development experts brought together by the United Nations Committee for Development Policy CDP a subsidiary body of the Economic and Social Council It will be of interest to policymakers worldwide experts of international agencies scholars students and the wider public APAIS 1999: Australian public affairs information service , **Constructions of Race, Place, and Nation** Peter Jackson,Jan Penrose,1994 High-Skilled Migration Mathias Czaika,2018-02-08 Political and scientific debates on migration policies have mostly focused on governments efforts to control or reduce low skilled asylum and irregular migration or to encourage the return migration of these categories Less research and constructive discourse has been conducted on the role and effectiveness of policies to attract or retain high skilled workers An improved understanding of the drivers and dynamics of high skilled migration is essential for effective policy making as most highly developed and emerging economies experience growing shortages of high skilled labour supply in certain occupations and sectors and skilled immigration is often viewed as one way of addressing these Simplistic assumptions that high skilled migrants are primarily in pursuit of higher wages raise the expectation that policies which open channels for high skilled immigration are generally successful Although many countries have introduced policies aimed at attracting and facilitating the recruitment of high skilled workers not all recruitment efforts have had the desired effects and anecdotal evidence on the effectiveness of these programmes is rather mixed The reason is that the rather narrow focus on migration policy coincides with a lack of systematic and rigorous consideration of other economic social and political drivers of migration which may be equally or

sometimes even more important than migration policies per se A better understanding of migration policies their making consequences and limitations requires a systematic knowledge of the broader economic social and political structures and their interaction in both origin and destination countries This book enhances this vibrant field of social scientific enquiry by providing a systematic multidisciplinary and global analysis of policies driving international high skilled migration processes in their interaction with other migration drivers at the individual city national and international level
