Language is Politics Frank van Splunder, 2019-11-27 Language is Politics discusses power relations between languages in the world with a particular focus on English Even though English is the most widely spoken and the most powerful language worldwide it is not the lingua franca it is often supposed to be The basic tenet of this book is that languages do not exist in the natural world

they are artefacts made by humans The book debunks some common myths about language and it suggests that we should be more modest in our assumptions for instance concerning the linguistic uniqueness of our own species The author argues in favour of an ecological or balanced approach to language This approach sees humans and other animals as part of the larger ecosystems that life depends on As in nature diversity is crucial to the survival of languages The current linguistic ecosystem is out of balance and this book shows that education can help to restore the balance and cope with the challenges of a multilingual and multicultural world With an ecological approach to language and a focus on narratives and personal language histories this will be key reading for researchers and academics as well as students of English language and linguistics

The Language(s) of Politics Nils Ringe, 2022-01-19 Multilingualism is an ever present feature in political contexts around the world including multilingual states and international organizations Increasingly consequential political decisions are negotiated between politicians who do not share a common native language Nils Ringe uses the European Union to investigate how politicians reliance on shared foreign languages and translation services affects politics and policy making Ringe s research illustrates how multilingualism is an inherent and consequential feature of EU politics that it depoliticizes policy making by reducing its political nature and potential for conflict An atmosphere with both foreign language use and a reliance on translation leads to communication that is simple utilitarian neutralized and involves commonly shared phrases and expressions Policymakers tend to disregard politically charged language and they are constrained in their ability to use vague or ambiguous language to gloss over disagreements by the need for consistency across languages
