## Politique Montaire Collectif:

**La Monnaie : entre violence et confiance** Michel Aglietta, André Orléan, 2002-04-01 Pourquoi l'euro a-t-il suscité l'engouement des Français ? Pourquoi la parité du peso et du dollar a-t-elle déclenché la violence des Argentins ? Ces questions l'économie traditionnelle est en mal de réponses. Peut-être parce que la monnaie n'est pas uniquement un phénomène économique. Michel Aglietta et André Orléan montrent comment elle constitue la clé de voûte des sociétés humaines, comment elle les fait passer tour à tour de la violence mimétique à la confiance institutionnelle, et comment son histoire, depuis les temps les plus reculés, est celle de la dissolution et de la constitution du lien social. Bref, qu'est-ce que la monnaie ? Pour Michel Aglietta et André Orléan, ce n'est pas un phénomène économique, c'est beaucoup plus que cela : c'est, selon l'expression de Marcel Mauss, un fait social total. Michel Aglietta est professeur à l'université Paris X et membre de l'Institut universitaire de France. André Orléan est directeur de recherche au CNRS et membre du CEPREMAP.

**Employment : the Focus of Collective Bargaining in Europe**, 2001 The insertion in June 1997 of a Title on employment in the Treaty on European Union has accelerated the drafting of European policy in this field over the last few years. This European dynamic has had widespread impact on the themes and mechanisms that characterise national systems of industrial relations. On the one hand, employment is increasingly governed by rules negotiated between the social partners and, depending on the circumstances, the State. This phenomenon of joint labour market regulation is confirmed by a marked desire on the part of employers' associations and trade unions to integrate employment-related issues into their actions and negotiations. On the other hand, the incorporation of employment-related themes by employers' associations and trade unions, usually in concertation with government policies, is related with greater coordination of bargaining and concertation mechanisms established at European level and within each Member State. Today the various national realities appear to be directed to various degrees by these two general tendencies. These phenomena active in the field of employment bargaining must therefore be analysed on three counts: the first focuses on the development of the coordination mechanisms that structure these negotiations and more specifically raises the issue of co-responsibility for the labour market; the second deals with the strict content of employment bargaining and examines the question of negotiated flexibility of working conditions and employment; the third addresses the autonomy of collective bargaining in Europe. This analysis informs our research, which is in turn intimately linked to recent changes taking place in national systems of industrial relations.
