

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska's population is 0.7 million, and it is the largest state in the United States per mile² – proportionally it would 1700,000 people within the same geographical area as Austin, Texas. The average is one of the smallest states and hence its population is only 7 million. In states 1 (Florida) and the 40 smallest total area are considered unrepresentative. What are the reasons for this high population density? How does it affect the outcome?
