The teacher uses technology to present information in a one-to-many learning environment.	The teacher uses technologies to offer students a variety of resources to learn and solve problems.	The teacher asks students to use technology resources of their choosing to learn and solve problems every day in class.
3. The teacher determines the technology skill level of students, knows the expected competencies for productivity and research, and finds means of remediation of individual students when needed.	The teacher knows individual skill levels, but moves on according to predetermined lesson plans.	The teacher has appropriate expectations of students based on their technology skill levels. Creates separate predetermined pathways for low and high skilled students.	The teacher uses formative assessments to gauge student skill development and provides flexible pathways, including student choice, for all learners.
