Intelligent Computing in Engineering and Architecture Ian F.C. Smith,2006-11-23 This book constitutes the thoroughly refereed proceedings of the 13th Workshop of the European Group for Intelligent Computing in Engineering and Architecture EG ICE 2006 held in Ascona Switzerland in June 2006 The 59 revised full papers were carefully reviewed and selected from numerous submissions for inclusion in the book All issues of advanced informatics are covered including a range of techniques Australian National Bibliography: 1992 National Library of Australia,1988 Prestack Depth Migration and Velocity Model Building Ian Frederick Jones,2008 In Prestack Depth Migration and Velocity Model Building SEG Geophysics Reprint Series No 25 the editors bring together works published since the early 1980s striking a balance between algorithm development and estimation of subsurface velocity and anisotropy parameters In that time span a radical change has occurred in the way seismic processing has delivered a subsurface image The traditional purely compartmentalized approach has been superseded by a multidisciplinary collaborative workflow to build iteratively a subsurface velocity model suitable for detailed and quantitative imaging Works that have had the most practical industrial application are emphasized rather than assessing all approaches equally Hence the bias is away from R D and toward industrial practice Because of the distribution of papers in this reprint edition split between migration algorithm and velocity estimation techniques this volume will appeal to processing specialists and interpretation geoscientists alike
