Living Pictures Noa Turel, 2020-09-25 A significant new interpretation of the emergence of Western pictorial realism When Jan van Eyck c 1390 1441 completed the revolutionary Ghent Altarpiece in 1432 it was unprecedented in European visual culture His novel visual strategies including lifelike detail not only helped make painting the defining medium of Western art they also ushered in new ways of seeing the world This highly original book explores Van Eyck s pivotal work as well as panels by Rogier van der Weyden and their followers to understand how viewers came to appreciate a world depicted in two dimensions Through careful examination of primary documents Noa Turel reveals that paintings were consistently

described as *au vif* made not from life but into life Animation not representation drove Van Eyck and his contemporaries Turel's interpretation reverses the commonly held belief that these artists were inspired by the era's burgeoning empiricism proposing instead that their living pictures helped create the conditions for empiricism Illustrated with exquisite fifteenth century paintings this volume asserts these works key role in shaping rather than simply mirroring the early modern world
