Reforming Juvenile Justice National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee on Assessing Juvenile Justice Reform, 2013-06-22 Adolescence is a distinct yet transient period of development between childhood and adulthood characterized by increased experimentation and risk taking a tendency to discount long term consequences and heightened sensitivity to peers and other social influences A key function of adolescence is developing an integrated sense of self including individualization separation from parents and personal identity Experimentation and novelty seeking behavior such as alcohol and drug use unsafe sex and reckless driving are thought to serve a number of adaptive functions despite their risks Research indicates that for most youth the period of risky experimentation does not extend beyond adolescence ceasing as identity becomes settled with maturity Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems This imbalance model implies dual systems one involved in cognitive and behavioral control and one involved in socio emotional processes Accordingly adolescents lack mature capacity for self regulations because the brain system that

influences pleasure seeking and emotional reactivity develops more rapidly than the brain system that supports self control This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century It was in this context that the Office of Juvenile Justice and Delinquency Prevention OJJDP asked the National Research Council to convene a committee to conduct a study of juvenile justice reform The goal of Reforming Juvenile Justice A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform to assess the new generation of reform activities occurring in the United States and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts *Study Guide for the Board of Certification, Inc., Athletic Trainer Certification Examination* Susan Rozzi,Michelle Futrell,2019-10-24 A complete roadmap to success on the Board of Certification Athletic Trainer Certification Examination This popular study guide delivers everything students need to sit for the exam with confidence Master the Firefighter Exams Peterson's,2013-06-04 Peterson s Master the Firefighter is an invaluable guide offering indispensable career and test preparation advice From information on the firefighter screening process to expert oral interview and job search advice to test taking strategies firefighter candidates will find everything needed to pass the firefighter exam on the local state and national level This guide includes a new math section additional computer based testing tips plus 4 full length practice tests AND an actual New York City Firefighter Department exam Perchance to DREAM Michael A. breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes: evidence-based practice and research supports the goal of caring for women, families, and children not only in traditional hospital settings but also wherever they live, work, study, or play. Clear, concise, and easy to follow: the content is organized around four major themes: holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

Handbook of Attachment Jude Cassidy, Phillip R. Shaver, 2018-03-19. Widely regarded as the state of the science reference on attachment, this handbook interweaves theory and cutting-edge research with clinical applications. Leading researchers examine the origins and development of attachment theory, present biological and evolutionary perspectives, and explore the role of attachment processes in relationships, including both parent-child and romantic bonds. Implications for mental health and psychotherapy are addressed, with reviews of exemplary attachment-oriented interventions for children and adolescents, adults, couples, and families. Contributors discuss best practices in assessment and critically evaluate available instruments and protocols.

New to This Edition: Chapters on genetics and epigenetics, psychoneuroimmunology, and sexual mating; Chapters on compassion, school readiness, and the caregiving system across the lifespan; Chapter probing the relation between attachment and other developmental influences. Nearly a decade's worth of theoretical and empirical advances.
