This chapter encompasses a variety of scales that refer to law enforcement or police agencies. Unfortunately, in the case of many scales, these terms are used simply with the assumption that the respondents understand the concepts and use them in the same way as researchers. In other cases, however, specific policing functions are identified and described. As noted in Chapter 3, a standard order of scale presentation is followed: First, the attitudes scales are presented, followed by the behavior ratings, personality measures, milieu ratings, prediction measures, and finally, the very broad category of description. After the reviews are completed within each subcategory, other scales in that category are listed. See Chapter 2 for a description of the criteria that were used in deciding upon whether a scale would be reviewed or simply listed. Listed scales are presented by title and bibliographic reference, followed by a very brief description.
