Reframing Police Education and Freedom in America Martin Alan Greenberg, Beth Allen Easterling, 2023-09-15 This book untangles the components of police education and advocates a robust community based training model with significant civilian oversight The recommended approach recognizes that the citizenry needs to be included in the provision of basic police education for it is they who must both support and be served by their police The police must be role models for society demonstrating that freedom and rights come with obligations both to the community as a whole and to individuals in need within that community Ultimately the quality of police training and the public's safety depend not only on the leadership of police executives as well as the quality of educational institutions and police candidates but also on the building of a community's trust in its police The issues of police recruitment education and retention have greater consequence in an era when protests and other signs of negativity surround law enforcement Several incidents including most notably George Floyd's murder by police have sparked new training initiatives regarding police de-escalation and community engagement At the same time the proliferation of gun violence and a contentious political climate have led some officers to refrain from undertaking proactive types of policing In this context reform of the police education system is urgent This book examines police training at all levels of government local regional state and federal In addition citizen participation programs including the role of the media and programs for furthering law related education LRE are highlighted The proposed police education model recognizes that ordinary members of the American public need to contribute to the provision of basic police education for it is they who must both support and be served by their police The focus is on teaching a guardian style of policing at the local level Police education would combine higher education necessary practical proficiencies and intensive field experiences through a gradual level of greater responsibility likely extending over a 2 plus year period for trainees with less than a year of previous college credits This book will be of interest to a wide range of audiences such as law enforcement professionals and trainers including those in executive development programs in police departments community leaders scholars and policy experts who specialize in policing concerned citizens and students of criminal justice especially those interested in police organization and management criminal justice policy and the historical development of police

The Basic Practice of Statistics Telecourse Study Guide David S. Moore,2010-07-27 The Basic Practice of Statistics has become a bestselling textbook by focusing on how statistics are gathered analyzed and applied to real problems and

situations and by confronting student anxieties about the course's relevance and difficulties head on. With David Moore's pioneering data analysis approach emphasizing statistical thinking over computation, engaging narrative and case studies, current problems and exercises, and an accessible level of mathematics, there is no more effective textbook for showing students what working statisticians do and what accurate interpretations of data can reveal about the world we live in. In the new edition, you will once again see how everything fits together. As always, Moore's text offers balanced content, beginning with data analysis, then covering probability and inference in the context of statistics as a whole. It provides a wealth of opportunities for students to work with data from a wide range of disciplines and real-world settings, emphasizing the big ideas of statistics in the context of learning specific skills used by professional statisticians. Thoroughly updated throughout, the new edition offers new content, features, cases, data sources, and exercises, plus new media support for instructors and students, including the latest version of the widely adopted StatsPortal. The full picture of the contemporary practice of statistics has never been so captivantly presented to an uninitiated audience.

Traffic Institute, 1992. Intended for the use of municipal police departments, this manual presents methods of determining the number and allocation of personnel for patrol and traffic services for municipal police agencies. The procedures are based on an analysis of officer workload with respect to the amount of time required to complete various tasks in four categories: reactive, proactive, self-initiated, and community policing; proactive, uncommitted patrol and administrative. The procedures rely on historical data and user-supplied performance objectives. Individual chapters present an overview of the methodology, guidelines regarding general implementation strategies, and issues of data definition and collection, a recommended data collection and implementation procedure, data requirements.
