The Specter of the Archive Nicholas Popper,2024-01-04 An exploration of the proliferation of paper in early modern Britain and its far reaching effects on politics and society We are used to thinking of ourselves as living in a time when more information is more available than ever before In *The Specter of the Archive* Nicholas Popper shows that earlier eras had to grapple with the same problem how to deal with too much information at their fingertips He reveals that early modern Britain was a society newly drowning in paper a light and durable technology whose spread allowed statesmen to record drafts memoranda and other ephemera that might otherwise have been lost and also made it possible for ordinary people to collect political texts As original paperwork and copies alike flooded the government information management became the core of politics Focusing on two of the primary political archives of early modern England the Tower of London Record Office and the State Paper Office Popper traces the circulation of their materials through the government and the broader public sphere In this early media saturated society we find the origins of many issues we face today Who shapes the archive Can we trust the pictures of the past and the present that it shows us And in a more politically urgent vein Does a huge volume of widely available information not all of it accurate risk contributing to polarization and extremism

 Office,1907 The Media Environment of Political Thought Asaf Y. Shamis,2017-10-11 The Media Environment of Political
 Thought offers a novel way of looking at the tradition of political thought by reconstructing the historical media landscapes in
 which great political texts of the past were produced It brings to light the little charted media environments in which two
 political innovators Jean Jacques Rousseau and Karl Marx operated and analyzes both how writing systems shaped their
 intellectual growth and how they used those systems to communicate their pioneering ideas The historical analysis is
 followed by a critical reflection on the future of political thought in the age of computer mediated communication Together
 the three studies presented in the book conjure up a view of the tradition of political thought as highly regulated stream of
 information shaped by historical writing systems Federal Register ,1975 *Language Arts* Mildred R.
