Canadian Private Pilot Manual, 1981-09 *The Pilot's Manual - Access to Flight* The Pilot's Manual Editorial Board, 2013-04-03 Hardcover PDF eBook version Hardcover textbook comes with code to download the eBook from ASA's website Whether you fly for pleasure business or a career in aviation the Private Pilot certificate with the Instrument Rating is your ticket into the full spectrum of the airspace system it is the key to maximizing the utility of a general aviation aircraft This book provides the information you need to learn how to fly under both visual flight rules VFR and instrument flight rules IFR The most comprehensive pilot textbook available The Pilot's Manual Access to Flight provides efficient training methodology that helps you graduate with a truly successful personal transportation solution Technically Advanced Aircraft TAA demand a level of understanding and functional proficiency as never before This breakthrough course is simply the most efficient and comprehensive way to prepare for flight in TAA and today's increasingly complex flight environment In addition chapter review questions will help prepare you for the FAA Private and Instrument Knowledge Tests General aviation has undergone an extraordinary transformation in recent years EFIS electronic flight instrument system or glass cockpit equipped aircraft once the exclusive realm of airline corporate and military pilots have now proliferated the GA landscape In what seemed like the blink of an eye pilots and instructors accustomed to flying aircraft equipped with conventional gauges that hadn't changed much in almost 50 years were now sitting behind sophisticated systems with glowing displays comparable only to some of the most advanced airliners and corporate jets These second generation Technically Advanced Aircraft TAA literally represented the coming of a new age and the promise of nearly unlimited potential At the same time however the arrival of these sophisticated aircraft created an unprecedented training and operational challenge never experienced in GA The Pilot's Manual Access to Flight has been specifically crafted to meet this challenge making use of methods that will allow pilots to obtain the maximum safety and utility from their aircraft For the first time ever private pilot and instrument rating curriculums are integrated so pilots flying TAA learn to intrinsically manage the combined skills of aircraft control task management systems management and the complex flight environment of today's busy airspace This is a very different approach from the practice of traditional maneuver based flight training used heretofore With a realization of

the inadequacy of maneuver based training as applied to TAA The Pilot's Manual Access to Flight embodies the state of the art industry training standards of scenario based training SBT learner centered grading and involvement and single pilot resource management SRM These are real world skills taught with a train like you fly fly like you train philosophy treating each and every lesson as a real flight This is where harnessing the power of all available resources and aeronautical decision making ADM become second nature Whereas maneuver based training focused specifically on simply learning to control the aircraft this new methodology involves considering an entire flight and all its component aspects from beginning to end
