Stojadinović, Vidosav D. Majstorović, 2019-02-09 This book examines an intelligent system for the inspection planning of prismatic parts on coordinate measuring machines CMMs The content focuses on four main elements the engineering ontology the model of inspection planning for prismatic parts on CMMs the optimisation model of the measuring path based on an ant colony approach and the model of probe configuration and setup planning based on a genetic algorithm The model of inspection planning for CMMs developed here addresses inspection feature construction the sampling strategy probe accessibility analysis automated collision free operation and probe path planning The proposed model offers a novel approach to intelligent inspection while also minimizing human involvement and thus the risk of human error through intelligent planning of the probe configuration and part setup The advantages of this approach include reduced preparation times due to the automatic generation of a measuring protocol potential optimisation of the measuring probe path i e less time needed for the actual measurement and increased planning process autonomy through minimal human involvement in the setup analysis and probe configuration *Monthly Catalog of United States Government Publications* United States. Design Computing and Cognition '04 John S. Gero,2004-07 Artificial intelligence provides an environmentally rich paradigm within which design research based on computational constructions can be carried out This has been one of the foundations for the developing field called design computing Recently there has been a growing interest in what designers do when they design and how they use computational tools This forms the basis of a newly emergent field called design cognition that draws partly on cognitive science This new conference series aims to provide a bridge between the two fields of design computing and design cognition The papers in this volume are from the First International Conference on Design Computing and Cognition DCC 04 held at the Massachusetts Institute of Technology USA They represent state of the art research and development in design computing and cognition They are of particular interest to researchers developers and users of advanced computation in design and those who need to gain a better understanding of designing     **Professional Engineer** ,1920     *Bibliography of Scientific and Industrial Reports* ,1946     **Laboratory Manual on Biotechnology** P.
