Procheorient Le Pouvoir La Terre Et L'eau:

Proche-Orient Pierre BLANC, 2012-09-13 Au Proche Orient la terre et l'eau cristallisent les jeux de pouvoir et les rivalités. La question foncière joue un rôle clé dans les bouleversements politiques que connaît cette région depuis le milieu du XXe siècle. Et l'accès à l'eau dont la plus grande partie est destinée à l'irrigation suscite des compétitions inter et intraterritoriales. Dans cet espace aride, l'essor démographique et les risques liés aux changements climatiques accroissent les tensions autour des questions agraires et alimentaires. De plus, l'agriculture, secteur forte dimension identitaire et territoriale, est souvent utilisée au service de politiques de contrôle de l'espace. Se concentrant sur cinq foyers géopolitiques importants du Proche Orient (Liban, Syrie, Israël, territoires palestiniens, Jordanie), cet ouvrage rappelle la place centrale de l'agriculture dans les stratégies de puissance et les logiques conflictuelles. Une leçon qui s'applique au Proche Orient comme au reste du monde.

Arab Political Thought Georges Corm, 2020-01-15 This book demonstrates the vitality of Arab political thought and its major controversies. It shows that the key players involved far from being constrained by a theological political straitjacket have often demonstrated strong critical thinking when tackling religion and philosophy, anthropology and politics. Setting these thinkers and their works within two centuries of upheaval in the Arab world, Georges Corm demonstrates how Arab critical thought has been marginalized by powerful external forces: the military, the academy and the media. In its place has risen a hegemonic Islamist thought used cannily by certain Arab regimes and their Western protectors. Closely tracing the successive transformations of modernist Arab nationalism, Arab Political Thought offers a blueprint for understanding the libertarian Arab Spring as well as the counter revolutions and external interventions that have followed. This invaluable guide comprehensively distils the complexity of Arab intellectualism which is both critical and profane and a far cry from the outdated politico-religious image it has acquired.

Migration and Agriculture Alessandra Corrado, Carlos de Castro, Domenico Perrotta, 2016-07-28 In recent years, Mediterranean agriculture has experienced important transformations which have led to new forms of labour and production and, in particular, to a surge in the recruitment of migrant labour. The Mediterranean Basin represents a very interesting arena that is able to illustrate labour conditions and mobility, the competition among different farming models and the consequences in terms of the proletarianization process, food crisis and diet changes. Migration and Agriculture brings together international contributors from across several disciplines to describe and analyse labour conditions and international migrations in relation to agri-food restructuring processes. This unique collection of articles connects migration issues with the proletarianization process and agrarian transitions that have affected Southern European as well as some Middle Eastern and Northern African countries in different ways. The chapters present case studies from a range of territories in the Mediterranean Basin, offering empirical data and theoretical analysis in order to grasp the complexity of the processes that are occurring. This book offers a uniquely comprehensive overview of migrations, territories and agri-food production in this key region and will be an indispensable resource to scholars in
