## **Production And Operation Management By Kanishka Bedi:**

Production and Operations Management Kanishka Bedi, 2004 Production and Operations Management is a comprehensive textbook designed to meet the expectations of MBA students by presenting concepts that are clearly explained using numerous solved examples of managerial applications. The book provides an in-depth coverage of topics such as facility location planning, facility capacity and layout planning, inventory management, aggregate planning and project management. Emerging concepts such as E-procurement and operating resource management, multiple criteria ABC analysis, location planning of foreign facilities and service quality measurement using SERVQUAL are given special treatment. Users will find this book highly useful for its MS Excel based practice problems and the applications of theoretical models and techniques through illustrations and caselets. The book includes discussions on issues and challenges faced by companies in the post liberalization era. A step-by-step approach to each topic, particularly those requiring statistical mathematical treatment. Features hands-on applications of data using MS Excel XP, MS Project 2000 and SPSS 10.0. Includes classroom tested cases on operations management practices in world-class organizations. End-chapter concept review questions include numerical problems with critical thinking. Includes interesting activities and projects.

POM SCL also incorporating operation strategies. This book has been designed conforming to the standards of this common subject for the courses of Master of Business Administration (MBA) and Post Graduate Diploma in Management (PGDM) prescribed by the All India Council of Technical Education (AICTE) and University Grants Commission (UGC). The book consists of sixty-five case study ideas covering almost the entire gamut of the subject concerned. All these cases are based on Indian organizations/industries using the characters with names typically Indian and the narrations of these cases reflect Indian work culture, value systems and ethos. All these cases are followed by a set of about half a dozen questions pertaining to the narrations with the corresponding answers suggested for the guidance of the teachers and the students alike. Apart from making the book very convenient and handy for studying the subject, it is also aimed at dispelling fears and apprehensions among the students with non-science/non-technical background that they seem to have about this subject. Getting familiar with the numerical exercises given and solved in this book by practice will make passing this subject a cakewalk for any average student. The cases are so designed as to expose the students to the realities and challenges to the actual professional

life while still seating in the class rooms much before entering a professional career The book provides a colossal value addition as both a complement and a supplement to the theories in the text books *OPERATIONS AND SUPPLY CHAIN MANAGEMENT* Prof. (Dr.) Milind Audumbar Kulkarni, Mr. Hemant Vishwanath More, 2022-06-20 What is Operations management Every business is managed through three major functions finance marketing and operations management Illustrates this by showing that the vice presidents of each of these functions report directly to the president or CEO of the company Other business functions such as accounting purchasing human resources and engineering support these three major functions Finance is the function responsible for managing cash flow current assets and capital investments Marketing is responsible for sales generating customer demand and understanding customer wants and needs Most of us have some idea of what finance and marketing are about but what does operations management do Operations management OM is the business function that plans organizes coordinates and controls the resources needed to produce a company's goods and services Operations management is a management function It involves managing people equipment technology information and many other resources Operations management is the central core function of every company This is true whether the company is large or small provides a physical good or a service is for profit or not for profit Every company has an operations management function Actually all the other organizational functions are there primarily to support the operations function Without operations there would be no goods or services to sell Consider a retailer such as The Gap which sells casual apparel The marketing function provides promotions for the merchandise and the finance function provides the needed capital It is the operations function however that plans and coordinates all the resources needed to design produce and deliver the merchandise to the various retail locations Without operations there would be no goods or services to sell to customers
