Kahn, Patricia Rodney, 2010-09-08 *Concepts and Cases in Nursing Ethics* is a case based exploration of the core principles of health care ethics applied to nursing. The book is a collaboration between philosopher ethicist Michael Yeo and nurse ethicist and educators Anne Moorhouse, Pamela Khan, and Patricia Rodney. It thus combines philosophical and ethical analysis with extensive knowledge and experience in nursing and health care. The book is organized around six main concepts in health care ethics: beneficence, autonomy, truthfulness, confidentiality, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in health care and nursing practice. In this new edition, the conceptual analysis throughout has been updated and reworked in view of changes in the health care system. In addition, there is a new chapter specifically devoted to recent developments affecting nursing and other health professions. Previous case studies have been modified and new ones added to address current and emerging issues. Although the text focuses mainly on the social and political situation of nursing, the analysis has relevance also for medicine and the allied health professions and indeed for anyone working in the health system. *Theoretical Basis for Nursing* Melanie McEwan, Evelyn M.

Wills, 2021-12-02 Concise, contemporary, and accessible to students with little to no prior knowledge of nursing theory, *Theoretical Basis for Nursing* 6th Edition clarifies the application of theory and helps students become more confident, well-rounded nurses. With balanced coverage of grand, middle-range, and shared theories, this acclaimed AJN Award-winning text is extensively researched and easy to read, providing an engaging, approachable guide to developing, analyzing, and evaluating theory in students' nursing careers. Updated content reflects the latest perspectives on clinical judgment, evidence-based practice, and situation-specific theories, accompanied by engaging resources that give students the confidence to apply concepts to their own practice. Lewis's Adult Health Nursing I & II (2 Volume Edition) with Complimentary Textbook of Professionalism, Professional Values and Ethics including Bioethics - E-Book Malarvizhi S., Renuka Gagan, Sonali

Banerjee, 2023-12-12 The second South Asia edition of Black's Adult Health Nursing I & II including Geriatric Nursing has been comprehensively updated to suit the regional curricula for undergraduate nursing students. This book will help student nurses to acquire the knowledge and skill required to render quality nursing care for all common medical and surgical conditions. The contents have been made easy to understand using case studies, concept maps, critical monitoring boxes, care plans, and more. This text provides a reliable foundation in anatomy and physiology, pathophysiology, medical surgical management, and nursing care for the full spectrum of adult health conditions and is richly illustrated with flow charts, drawings, and photographs and South Asian epidemiological disease data for better understanding of the subject. Integrating Pharmacology boxes help students understand how medications are used for disease management by exploring common classifications of routinely used medications. Review questions have been added to all the units within this book. This second South Asia edition will be a valuable addition to every student nurse's bookshelf given the revisions and modifications.
