Professional Truckers Exit Guide:

ExitSource 2001 Professional Truck Drivers Exit Guide Exit Source Guides, Interstate America Publishing, Incorporated, 2001-01-01 **Professional Truckers Guide: To Certified Truck Dealerships for Parts and Service** Gary Whiting, 2009-10-09 *Commercial Carrier Journal for Professional Fleet Managers*, 1999-07 *A professional truck driver's guide on the use of retarders*, 1985 **Common Sense Guide to Driving a Truck** Harry Gorge, 2011-08-17 A COLLECTION OF STORIES FROM OVER 30 YEARS OF EXPERIENCE AS A SAFETYMAN LICENSED INSTRUCTOR STATE DRIVING CHAMPION AND PROFESSIONAL DRIVER A HUMOROUS AND REALISTIC GUIDE TO HELP THE AVERAGE TRUCK DRIVER BETTER UNDERSTAND THE LAWS RULES AND REGULATIONS IN AN EASY TO READ FORMAT THIS BOOK ALSO COVERS THE CSA2010 AND STORIES FROM THE STREET AS A LOCAL DRIVER FROM THE ROAD AS A LONG HAUL DRIVER FROM THE CLASSROOM ROAD TESTS AND DURING TRAINING AS A SAFETYMAN ALSO SOME STORIES FROM THE DRIVING CHAMPIONSHIPS I BELIEVE ANYONE IN THE TRUCKING INDUSTRY WILL ENJOY RAEDING THIS BOOK **Estimation of the Demand for Commercial Truck Parking on Interstate Highways in Virginia** Nicholas J. Garber, Hua Wang, 2004 The steady growth of commercial truck travel has led to an increasing demand for truck parking spaces at public rest areas and private truck stops on interstate highways in Virginia This study developed a methodology to determine the supply and demand for commercial truck parking along these corridors Supply was defined as the number of parking spaces available for commercial truck parking and demand was defined as the sum of the parking accumulation and illegal parking at a given time Phase I of this study developed a methodology to determine the supply and demand for commercial truck parking using I 81 in Virginia as a case study This Phase II study expanded the study to other interstate highways in Virginia checked the applicability of the parking demand model developed in Phase I and developed new models when necessary Extensive data on the characteristics of commercial truck parking and the characteristics of each truck stop and rest area were collected In addition truck drivers and truck stop owners operators were surveyed The data collected were used to develop models to describe the relationship between parking accumulation and independent variables such as traffic volume on the highway truck percentage parking duration and the distance from a highway to a truck stop After the applicability of the models was tested they were used to estimate commercial truck parking demand in 2010 and 2020 Deficiencies of parking spaces with respect to estimated demand were then determined for each truck stop and the entire Virginia interstate highway system The results indicate that the demand for commercial truck parking at individual truck stops on I 95 exceeds the supply by 10 to 22 percent and that there is no commercial parking shortfall at truck stops along I 64 I 77 and I 85 However there are shortfalls at rest areas on I 66 I 77 I 85 and I 95 varying from about 6 percent on I 85 to about 32 percent on I 95 If no new parking spaces are provided and a 5 percent increase in truck travel is assumed the demand supply ratio in 2010 for large truck parking on all interstate highways in Virginia will exceed 1 00 This

deficiency could be as high as 40 percent on I 95

Estimating the Supply and Demand for Commercial Heavy Truck Parking on Interstate Highways Nicholas J. Garber, Hua Wang, Dares Charoenphol, 2002 The increasing number of trucks traveling on Virginia highways has led to a growing demand for public rest areas and private truck stops This study developed a methodology to determine the supply and demand for commercial heavy truck parking using I 81 in Virginia as a case study In this study supply was defined as the number of parking spaces available for large truck parking and demand at a given time was defined as the sum of the parking accumulation and the illegal parking Extensive data on the characteristics of large truck parking including parking duration and accumulation for different times of day were obtained Data were obtained at 14 public rest areas and 29 private truck stops Detailed information was also obtained on the characteristics of each truck stop and rest area including the location number and types of parking spaces and availability of other facilities such as restaurants and showers Two types of questionnaire surveys were conducted The first involved truck drivers and the second involved truck stop managers owners The data collected were used to develop models to describe the relationship between parking accumulation and independent variables such as traffic volume on the highway truck percentage parking duration and the distance of a truck stop from the interstate The models developed were then used to estimate demand in 10 and 20 years Any shortfall in supply with respect to the estimated demand was then determined for each truck stop and the entire highway The results indicated that the existing maximum demand is 2 947 parking spaces which exceeds the supply by 309 spaces This deficiency will increase to 1 193 and 1 463 spaces in 2010 and 2020 respectively if the number of parking spaces for large trucks does not increase
