SS8P / SS4P Speaker Selectors

INTRODUCTION

Proficient Speaker Selectors allow the operation of multiple pairs of speakers when using one amplifier or receiver. Once the speakers are connected to the speaker selector, individual pairs may be turned on or off as desired using the push buttons on the front panel. One pair, all pairs or any assortment of pairs may be played. When engaged, a protection circuit allows the amplifier to operate safely, even when all selected

speakers are playing. Installation utilizing the Removable Terminal Connectors makes wiring the selector to your speakers quick and easy. With a simple turn of a screw, wires are solidly fastened and a secure electrical bond is created. The process is quick, simple and eliminates the worry of wires becoming loose.

INSTALLATION

Guidelines

- Use the Speaker Selectors only with amplifiers rated at 125 watts per channel or less.
- The Removable Terminal Connectors on the SS8P and SS4P accept wire up to 14 AWG. If you are not sure about the gauge of the wire you intend to use, please consult your Proficient installing dealer.
- To avoid possible damage to your amplifier, pay careful attention to the section titled "Operation" on page 3.
- One set of adhesive area labels are included for identifying the locations of speakers on the front of the Speaker Selector.
- Do not daisy chain (hook the outputs of one selector into the inputs of another) speaker selectors together.
- Do not connect impedance matching volume controls to the speaker outputs of the selectors. Standard volume controls, such as Proficient models VCS60, VC60SIR, VC60SL and VC60AW should be used if separate room control is desired.

Placement

The suction feet hold the speaker selectors in place when buttons are depressed.
