Major Sam Call, now retired from the Army, has joined LNMB Investigations, owned by his friend David Lytle. David was instrumental in helping Sam uncover the identity of an escaped German POW, solve a war crime that had remained hidden for 45 years, and also bring home a soldier missing since 1945. IdentityPoint, a public records company, is a major player in the relatively new world of computerized public records, providing the government and private companies with reports on an individual's data, which revealed everything from the person's birth to their death and everything in between. One corporate officer believes others in IdentityPoint have been illegally benefiting from a string of acquisitions and hires LNMB to go undercover to seek the financial data to prove her suspicions. Along with David's long-time associate Bob, a small unassuming but extremely resourceful man, Sam is immersed in a mesmerizing world of data and computers and quickly discovers the immense power the company and the data have over the lives of typical citizens. While using the company's powerful reporting tools, Sam unknowingly alerts the F B I, and Sam once again finds himself the target of those who would wish to silence anything Sam has to say, as well as silencing Sam permanently. Set in Georgia, British Virgin Islands, and Washington D C, Very Public Data explores the world of public records, secret organizations, world of personal identity systems, and those that build them and those who abuse them. Very Public Data unveils both the positive and negative power of public data, and while this is a tale of corruption, murder, and deception, it is also a celebration of the love of a man and a woman, the unbreakable bond of soldiers, and the undying strength that honor brings to the human spirit. Supreme Court, Appellate Division - First Department, **June 10, 1999 Olympic Pipe Line accident**

United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2003. Until three young men were killed in a devastating liquid pipeline explosion in Bellingham last year, most of us paid little or no attention to pipeline safety. The tragic events of June 10th changed that. While pipelines continue to be the safest means of transporting liquid fuels and gas, and though accidents may be infrequent, and the more than two million miles of pipelines in the United States often invisible, Bellingham has shown us that pipelines pose potential dangers that we ignore at our peril. Page 1 Water and Wastewater Pipeline Assessment Technologies Justin Starr, 2021-05-31. Water and wastewater infrastructure are a somewhat invisible yet critical part of modern life. Incredibly, many buried assets have been in service for 50-100 years and are still in good condition. Conversely, other systems fail well before their predicted design lives, causing property damage, injury, and even loss of life. In many cases, early detection could have prevented catastrophic failure, and understanding the state of underground infrastructure has become a key priority for many municipalities. Industry has responded with a number of new and innovative technologies for condition assessment.

however understanding these tools can be difficult as many vendors treat their proprietary systems as trade secrets Water and Wastewater Pipeline Assessment Technologies Classification Systems Sensors and Results Interpretation provides a thorough guide to the technical workings of some of the most popular water and wastewater assessment technologies available including CCTV crawlers acoustic listening devices laser sensors 360 video cameras pipe penetrating radar and more Features Presents an overview of current technologies in CCTV inspection including next generation video formats high definition resolution and fisheye sidescan technology Provides helpful tips and tricks to cut through technical jargon and identify the technological specifications to compare between multiple vendors Examines the pros and cons of competing technologies including laser and lidar and provides an overview of unique approaches such as Pipe Penetrating Radar Focused Electrode Leak Location and more Highlights the importance of coding standards data management and software tools that can be leveraged to create a successful asset management program Water and Wastewater Pipeline Assessment Technologies Classification Systems Sensors and Results Interpretation provides a mixture of theory and real world practical considerations ranging from deployment tips and data exchange formats to the technical limitations of different technologies The book is a valuable resource for municipal employees project engineers and others involved in designing and
