sunflecks / solar tracking - ✓ ✓ day length is the more important thing to plants because it is consistent across certain units of time. On any given day, the day length is going to be the same cross years.

plants use light to tell time, which allows them to accurately estimate when they need to regulate their physiology and development.

light cycles are consistent: many of these developmental processes are time sensitive:
flowering - pollinator arrival

- seed germination and bud break during spring when water is plentiful
- senescence in the fall prior to the coming of winter
