Prentice Hall Brief Review Global History 201:

The Power of Scale: A Global History Approach John Bodley, 2015-06-01 Throughout history the natural human inclination to accumulate social power has led to growth and scale increases that benefit the few at the expense of the many John Bodley looks at global history through the lens of power and scale theory and draws on history economics anthropology and sociology to demonstrate how individuals have been the agents of social change not social classes Filled with tables and data to support his argument this book considers how increases in scale necessarily lead to an increasingly small elite gaining disproportionate power making democratic control more difficult to achieve and maintain

The Allure of Battle Cathal Nolan, 2017-01-02 History has tended to measure war's winners and losers in terms of its major engagements battles in which the result was so clear cut that they could be considered decisive Cannae Konigsberg Austerlitz Midway Agincourt all resonate in the literature of war and in our imaginations as tide turning But these legendary battles may or may not have determined the final outcome of the wars in which they were fought Nor has the genius of the so called Great Captains from Alexander the Great to Frederick the Great and Napoleon play a major role Wars are decided in other ways Cathal J Nolan's *The Allure of Battle* systematically and engrossingly examines the great battles tracing what he calls short war thinking the hope that victory might be swift and wars brief As he proves persuasively however such has almost never been the case Even the major engagements have mainly

contributed to victory or defeat by accelerating the erosion of the other side's defences. Massive conflicts, the so-called people's wars beginning with Napoleon and continuing until 1945, have consisted of and been determined by prolonged stalemate and attrition industrial wars in which the determining factor has been not military but material. Nolan's masterful book places battles squarely and mercilessly within the context of the wider conflict in which they took place. In the process, it helps correct a distorted view of battle's role in war, replacing popular images of the battles of annihilation with somber appreciation of the commitments and human sacrifices made throughout centuries of war, particularly among the Great Powers. Accessible, provocative, exhaustive and illuminating, *The Allure of Battle* will spark fresh debate about the history and conduct of warfare.

Bibliography of the History of Medicine, *The Origins of Capitalism and the "Rise of the West"* Eric Mielants, 2008-03-15. In this study, Eric Mielants provides a novel interdisciplinary interpretation of the origins of modernity and capitalism in particular. He argues that, contrary to popular thinking, the Rise of the West should not be analyzed in terms of the Industrial Revolution or the colonization of the New World, but viewed from long-term developments that occurred in the Middle Ages. A fascinating overview of different civilizations in East Asia, South Asia, and Northwestern Africa is provided and systematically compared and contrasted with Western Europe. This book addresses some of the major debates that have recently unfolded in world history, comparative sociology, political economy, sociological theory, and historical sociology. Mielants indicates how many existing theories, such as Marxism, World Systems Theory, and Smithian Modernization Theory, have suffered from either Eurocentric or limited temporal and spatial analyses, which prevents them from a complete understanding of why the origins of capitalism and citizenship emerged in Western Europe.

Environments, Natures and Social Theory Damian White, Alan Rudy, Brian Gareau, 2017-09-16. From climate change to fossil fuel dependency, from the uneven effects of natural disasters to the loss of biodiversity, complex socio-environmental problems indicate the urgency for cross-disciplinary research into the ways in which the social, the natural, and the technological are ever more entangled. This ground-breaking text moves between environmental sociology and environmental geography, political and social ecology, and critical design studies to provide a definitive mapping of the state of environmental social theory in the age of the anthropocene. *Environments, Natures and Social Theory* provokes dialogue and confrontation between critical political economists, actor-network theorists, neo-Malthusians, and environmental justice advocates. It maps out the new environmental politics of hybridity, moving from hybrid neo-liberals to end-times ecologists, from post-environmentalists to cyborg eco-socialists. White, Rudy, and Gareau insist on the necessity of a critical but optimistic hybrid politics, arguing that a more just, egalitarian, democratic, and sustainable anthropocene is within our grasp. This will only be brought into being, however, by

reclaiming celebrating and channeling the reconstructive potential of entangled hybrid humans as inventive hominids creative gardeners critical publics and political agents Written in an accessible style Environments Natures and Social Theory is an essential resource for undergraduate and postgraduate students across the social sciences **Blinders, Blunders, and Wars** David C.
