pain related distress and construct pain as a potentially positive experience *Rethinking Pain in Person Centred Health Care* is
a fascinating contribution to the multidisciplinary literature on person centred health care pain and ethics Traditionally

perspectives Applied to pain an instrumental approach promotes the immediate and effective relief of pain due to the
widespread suffering and expense it can cause However different persons experience pain in different ways and Buetow
moves beyond a commitment to eliminate pain to exploring how benefits of pain could include creating and managing
meaning from pain Rather than always looking to put pain behind them persons may flourish by moving around pain through
pain into pain and above pain Buetow argues that this model depends on adopting a person centred approach to health care
focusing less on the condition of pain and more on mobilizing the persons who present with and manage pain This book will
be of interest to professionals and academics researchers in the fields of psychology and psychiatry who have a special
