Teaching and Learning Proof Across the Grades Despina A. Stylianou, Maria L. Blanton, Eric J. Knuth, 2010-09-23. A Co Publication of Routledge for the National Council of Teachers of Mathematics (NCTM). In recent years, there has been increased interest in the nature and role of proof in mathematics education, with many mathematics educators advocating that proof should be a central part of the mathematics education of students at all grade levels. This important new collection provides that much needed forum for mathematics educators to articulate a connected K-16 story of proof. Such a story includes understanding how the forms of proof, including the nature of argumentation and justification, as well as what counts as proof, evolve chronologically and cognitively, and how curricula and

instruction can support the development of students understanding of proof Collectively these essays inform educators and researchers at different grade levels about the teaching and learning of proof at each level and thus help advance the design of further empirical and theoretical work in this area By building and extending on existing research and by allowing a variety of voices from the field to be heard Teaching and Learning Proof Across the Grades not only highlights the main ideas that have recently emerged on proof research but also defines an agenda for future study **Books in Print** ,1962
