

Chapter 11, Introduction to Genetics (continued)

Section 11-4 Meiosis (pages 275–278)

This section explains how gametes form in the process of meiosis. It also explains how meiosis is different from mitosis.

Introduction (page 275)

1. List the two things that Mendel's principles of genetics required in order to be true.

- a. _____

 b. _____

Chromosome Number (page 275)

2. What does it mean when two sets of chromosomes are homologous? _____

3. Circle the letter of each way to describe a diploid cell.

- a. $2N$
 b. Contains two sets of homologous chromosomes
 c. Contains a single set of homologous chromosomes
 d. A gamete

4. Circle the letter of the number of chromosomes in a haploid *Drosophila* cell.

- a. 8 b. 4 c. 2 d. 0

Phases of Meiosis (pages 276–277)

5. Draw the chromosomes in the diagrams below to show the correct phase of meiosis.

Plant Reproductive Ecology : Patterns and Strategies Jon and Lesley Lovett-Doust Professor of Biology the University of Windsor,1988-07-07 This collection of reviews by leading investigators examines plant reproduction and sexuality within a framework of evolutionary ecology providing an up to date account of the field The contributors discuss conceptual issues showing the importance of sex allocation sexual selection and inclusive fitness and the dimensions of paternity and maternity in plants The evolution maintenance and loss of self incompatibility in plants the nature of sex choice in plants and sex dimorphism are all explored in detail Specific forms of biotic interactions shaping the evolution of plant reproductive strategy are discussed and a taxonomically based review of the reproductive ecology of non angiosperm plant groups such as bryophytes ferns and algae is presented Together these studies focus on the complexities of plant life cycles and the distinctive reproductive biologies of these organisms while showing the similarities between nonflowering plants and the more thoroughly documented flowering species

Radiation Shielding and Dosimetry A. Edward Profio,1979 An up to date reference and text that discusses the design of shields for radioactive sources X ray machines low energy accelerators and nuclear reactors Introduces dosimetry in industry and medicine examining the prediction and measurement of dose in the body from external and internal sources and the biological effects of ionization radiation The unified treatment emphasizes recent practice and includes modern computer methods and results And the considerable data presented in tabular and graphical forms provide a ready reference that minimizes the need for supplementary literature

Phytoplankton and Equilibrium Concept: The Ecology of Steady-State Assemblages Luigi Naselli-Flores,Judit Padisák,Martin F. Bach,2013-06-29 This volume summarises the outcome of the 13th Workshop of the

International Association of Phytoplankton Taxonomy and Ecology IAP on if and if so under what conditions phytoplankton assemblages reach equilibrium in natural environments Quite a number of ecological concepts use terms such as ecological equilibrium stability steady state climax stable state etc However these ecological concepts often have been translations of scientific theories developed in physics or chemistry but they almost always lack scientific corroboration the problem being that often these concepts remain vague and they are not formally defined Here an attempt to formally recognize what equilibrium is in phytoplankton ecology is traced The book also contains papers by leading scientists on the taxonomy of two selected key groups cryptomonads and filamentous cyanoprokaryotes This volume is addressed to all those involved in phytoplankton taxonomy and ecology and in ecology itself **Environmental Health Perspectives** ,1993 **Manual of the Public Examinations Board** University of Adelaide.
