Julia Schneider

Roland Rd 300 Manual:

V01CE Norie Neumark, Ross Gibson, Theo Van Leeuwen, 2023-12-05 Perspectives on the voice and technology from discussions of voice mail and podcasts to reflections on dance and sound poetry Voice has returned to both theoretical and artistic agendas In the digital era techniques and technologies of voice have provoked insistent questioning of the distinction between the human voice and the voice of the machine between genuine and synthetic affect between the uniqueness of an individual voice and the social and cultural forces that shape it This volume offers interdisciplinary perspectives on these topics from history philosophy cultural theory film dance poetry media arts and computer games Many chapters demonstrate Lewis Mumford's idea of the cultural preparation that precedes technological innovation that socially important new technologies are foreshadowed in philosophy the arts and everyday pastimes Chapters cover such technologies as voice mail podcasting and digital approximations of the human voice A number of authors explore the performance performativity and authenticity or authenticity effect of voice in dance poetry film and media arts while others examine more immaterial concerns the voice's often invoked magical powers the ghostliness of disembodied voices and posthuman vocalization The chapters evoke an often paradoxical reassertion of the human in the use of voice in mainstream media including recorded music films and computer games Contributors Mark Amerika Isabelle Arvers Giselle Beiguelman Philip Brophy Ross Gibson Brandon LaBelle Thomas Levin Helen Macallan Virginia Madsen Meredith Morse Norie Neumark Andrew Plain John Potts Theresa M Senft Nermin Saybasili Amanda Stewart Axel Stockburger Michael Taussig Martin Thomas Theo van Leeuwen Mark Wood
