

Interpreting Physical Therapy Notes

Sending a patient to physical therapy does not always guarantee that they are going to receive the same treatment. In fact, the same patient with the same diagnosis sent to varying practices most likely will receive a variety of different treatment techniques. While all aimed at decreasing pain, increasing strength, and improving the patients' function, each therapist has their own different methods and techniques in which they feel will lead to the patient's recovery. Even when different therapists see the same patient in the same therapy practice, they often come up with a different plan of care for the patient to follow.

Some therapists may choose a modality oriented therapy approach, while others advocate exercises. Some therapists are overly aggressive with their patients and some insist on passive therapies. Many work injury patients endure an industrial rehabilitation approach while others go through more hands-on therapy. Most therapies have been proven to be successful and often if one approach is not working the therapist will switch gears to concentrate on a different technique. No one can say for sure which therapy technique would be most appropriate until the patient begins therapy.

Since there are so many different types of physical therapy, all aimed at accomplishing similar goals – often it is the case manager who finds themselves attempting to determine whether or not the therapy that the patient is receiving is justified, necessary, and appropriate.

Reading therapy notes

Scrutinizing Physical Therapy notes is an expected part of a case manager's job description. The case manager might need to estimate return to work dates or provide assistance in preparing the patient for return to work. Often, the case manager can provide input to the physician regarding their therapy. All too often this task becomes a struggle as medical terminology, medical abbreviations and what appears to be pure hieroglyphics get in the way.

Most physical therapy notes are written in a basic S.O.A.P. note format. The S.O.A.P. standing for Subjective, Objective, Analysis/Assessment and Plan. While not always defined by the letter, most PT notes will contain the S.O.A.P. information within the note. The case manager should be able to not only read the note, but interpret whether the correct course of action is being followed.
