

Physics 105B (Continued) 10

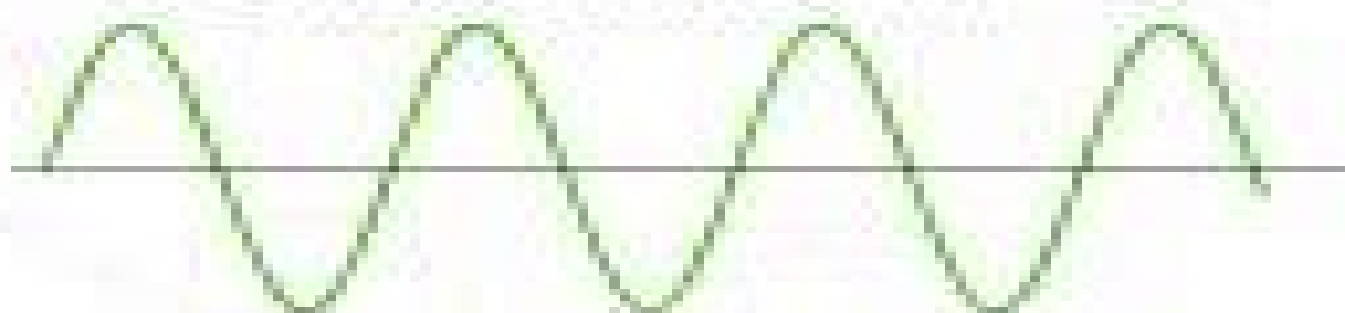

Now take in the frequency of light over 1 nanosecond (approximately 1.8).

Question 8 (continued): Answer all the questions and submit your solution for Canvas and PSET.

Answer your question: How will you get inside this strongly reflecting & refractive medium for your "mirror"? You must reflect your incoming electromagnetic wave, and someone with that knowledge has indicated that you will need to make it traveling for 1000 Å (1000 nm) in order to get it off your frequency. How long is the 1000 Å (1000 nm) wave you receive, e.g., $\lambda_{\text{received}} = 1000$ nm (1000 nm) $\lambda_{\text{received}} = 1000$ nm.

- (1) How do we know that light travels through a medium? (Answer: Light travels through a medium, not just light travels through a medium.)

- (2) The electromagnetic wave propagates with a wave number k and a wavelength λ and amplitude. What is the wavelength λ ?

- (3) How long is the wave propagating over a width λ (the frequency and amplitude)?
