

Chapter No. 1**MEASUREMENTS**

Q. Define Physics. Describe its main areas of research.

Ans. Physics is the branch of science that deals with matter, energy and the relationship between them. The study of physics involves laws of motion, the structure of space and time, the nature and types of forces, the interaction between different particles, the interaction of radiation with matter etc.

Q. What do you know about natural philosophy?

Ans. Initially, the observation of man about the world around him give birth to the single discipline of science called natural philosophy.

Q. Differentiate between physical and biological sciences.

Ans. Difference between physical and biological sciences.

Physical Sciences	Biological Sciences
Physical sciences deal with non-living things	Biological sciences deal with living things

Q. Define the following branches of modern physics.

1) Nuclear Physics 2) Particle Physics 3) Relativistic Mechanics 4) Solid State Physics

Ans. Nuclear Physics. The Nuclear physics deals with atomic nuclei.

Particle Physics. It deals with ultimate particles with which the matter is composed.

Relativistic Mechanics. It deals with motion of bodies which move with very large velocities (approaching to the velocity of light).

Solid State Physics. The solid state physics deals with structure and properties of matter.

Q. Write down the significance of science and technology. Describe the role of physics in the development of science and technology.

Ans. Modern tools of science and technology have brought all parts of world in close contact. The information media and fast means of communications have made the world global village. The computer network play pivotal roles in the development of science and technology. The computer networks are products of chips developed from basic ideas of physics.

Q. What do you know about physical quantities? Describe their significance.

Ans. The quantities that can be measured and are used to describe the properties of matter are called physical quantities.

Significance. The foundation of physics rest upon physical quantities in terms of which the laws of physics are expressed.

Q. Write the difference between base and derived quantities.

Ans. Difference between base and derived quantities.
