

14. Add a line to show the path of the red light through the prism.

15. The student replaces the red light with a white light. Explain what the student will observe and why?

The student will see a spectrum.

This is created as white light is made from many different colours (wavelengths) of light.

The different colours (wavelengths) will reflect at different angles as they pass through the prism.

Task 3: Explaining refraction

16. A student tries to explain refraction by comparing the car of light entering a glass block to a car traveling off the road onto sand.

The student makes a sketch as shown below:
